

OpenEarth and Frame of Reference mentioned as two of MICORE's five key outcomes

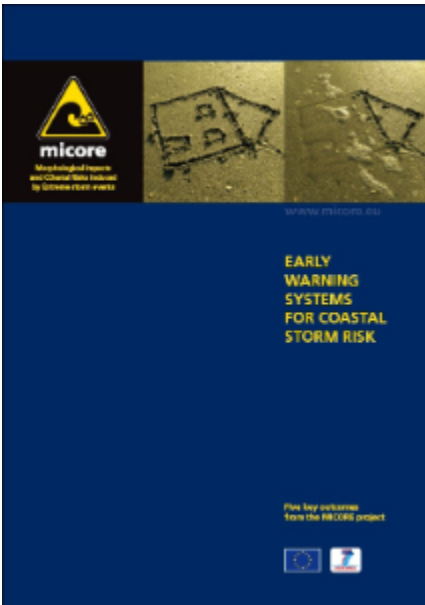

The EU FP7 project MICORE prepared an executive summary with the five main outcomes of the project. Among the key outcomes are:

- the success of use of [OpenEarth](#) as a protocol for data and knowledge sharing
- the use of the [Frame of Reference](#) approach as a means to build bridges between coastal experts and end-users

The English as well as the Dutch version may be downloaded below
