

JIRA Delft-FEWS 2017.02 New Features								
Key	Component/s	Summary	Release Note Text	Release Note Text Description	Config Example	Images	Link to Documentation	Customer name
FEWS-17763	App - Admin Web User Interface	FEWS-16767 Test AI functionality with new database schema changes						Deltas
FEWS-17715	App - Admin Web User Interface	AI should check jdbc driver version	The system status page provides a warning when an older jdbc driver is used and provides a tooltip when all is well.	There have been some problems with older jdbc drivers and they have been replaced in the master controller. However the jdbc drivers in the admin interface might also need updating. The migration update procedure now also includes a check of the jdbc driver in memory and in the admin interface. The system status page now warns if this step was not executed properly as a precaution. Jdbc driver versions postgres 42 and oracle 12.2 are now required (included in master-controller lib directory).				Deltas
FEWS-16904	App - Admin Web User Interface	FEWS-16887 NWS: #24695 AI scheduled tasks should be MC specific	Allow downloading tasks for the current MC only	The admin interface has been extended to support downloading tasks for the current MC only. The following scheduled tasks actions are now available:	<b>Scheduled Tasks</b> <ul style="list-style-type: none"><li>• Schedule New Task</li><li>• Upload Task(s) from File</li><li>• Download Scheduled Tasks: All Current MC</li></ul> <b>Forecast Tasks</b> <b>Scheduled Tasks</b> <ul style="list-style-type: none"><li>• Schedule New Task</li><li>• Upload Task(s) from File</li><li>• Download All Scheduled Tasks <small>Only tasks of current MC</small></li></ul>			NWS
FEWS-16268	App - Admin Web User Interface	FEWS-16767 AI: additional functionalities	Admin Interface displays status for synchronization, rolling barrel, system alerter and task runs	Admin Interface displays status for synchronization, rolling barrel, system alerter and task runs				Deltas - Roadmaps
FEWS-18523	App - Admin Web User Interface	FEWS-16767 AI: Add button to update schema modification time to force rebuilding cache files	AI: Add button to update schema modification time to force rebuilding cache files	SystemControl now has a button to force clear cache on RSSs.				Deltas - Roadmaps
FEWS-17527	App - Archive	Verify that the export to the archive is successful						Deltas - Roadmaps
FEWS-17660	App - Archive	remove dependency from tomcat for archive backend	the architecture of the archive is simplified	To make it easier to write unit tests for the archive the architecture is now simplified. It is now possible to start the core of the archive server without tomcat. This will make it easier to write unit tests and develop new functionality.				Deltas - Roadmaps
FEWS-17265	App - Archive	FEWS-17265 TVA: webservice request for checkbox to allow filtering on data type	onlyforecasts can be used to only get forecast time series from the pi service	onlyforecasts can be used to only get forecast time series from the pi service				TVA
FEWS-17477	App - Archive	Cache elastic search queries only for the requesting thread	code improvement for the seamless integration	To improve the performance of the seamless integration requests are cached. The results are now stored in cache specific for the requesting thread.				Deltas
FEWS-18018	App - Archive	FEWS-14334 Verify exported metadata file for simulated datasets	additional check in archive export	To ensure that the data is exported correctly to the archive an additional check is added. The export will now verify that all exported netcdf files are listed in the metadata.xml file.				Deltas
FEWS-16882	App - Archive	FEWS-15003 make it possible to access elastic catalogue by the piwebservice	access the elastic catalogue by the piwebservice	In the future it will be possible to access the elastic catalogue by the pi websevice. In this release a temporary version is available. It is mainly used for demo and evaluating purposes and will be extended later to final production version.				BPA
FEWS-18344	App - Archive, Plugin - Gui - System Monitor	FEWS-14334 Open Archive status in SystemMonitor	Archive Server Status in SystemMonitor	When Fews is connected to Archive version 2017.02 or higher, then the status of the Archive is shown in a separate tab "Archive Server Status" in SystemMonitor. The picture ArchiveStatus.png shows an example of this tab.				
FEWS-17898	App - Configuration Manager Gui, Database	FEWS-16767 Migrate default config tables to default config synch level	DatabaseInitialization tool migrates default config tables	The databaseinitialization tool will migrate default config tables to synch level 11 for the corresponding table. After completion the default config tables will be deleted.			<a href="https://publicwiki.deltas.nl/display/FEWS2020/Data+gui+initializationtool">https://publicwiki.deltas.nl/display/FEWS2020/Data+gui+initializationtool</a>	Deltas - Roadmaps
FEWS-16447	App - Data Conversion Module	DCM Export: MeteoAlarm						RWS
FEWS-18199	App - Delft FEWS	FEWS-16767 Reduce size of log files from 0%						Deltas, Roadmaps
FEWS-18102	App - Master Controller Server, Database	FEWS-16767 Reduce number of database connections per OCFSPPN to 4						Deltas, Roadmaps
FEWS-17355	App - Master Controller Server, Database	FEWS-16767 Create MC datasource						Deltas, Roadmaps
FEWS-17401	App - Master Controller Server	FEWS-16767 Remove populator						Deltas, Roadmaps
FEWS-17516	App - Master Controller Server	FEWS-16767 Implement Delft_SQL.jar in MC code						Deltas, Roadmaps
FEWS-17764	App - Master Controller Server	FEWS-16767 MC initialisation						Deltas, Roadmaps
FEWS-18240	App - Master Controller Server	FEWS-16767 System Alerter and Log Processor						Deltas - Roadmaps

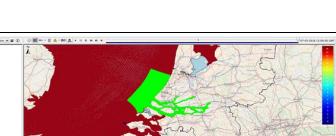

JIRA Delft-FEWS 2017.02 New Features						
FEWS17560	App - Master Controller Server	FEWS-16663 Quebec - Eliminate plain-text database password in fews.master.mc.conf	Make it possible to use encryptedPassword in fews.master.mc.conf	Configurator can now generate a fews.master.mc.conf with an encryptedPassword for the database connection	<pre>[code] &lt;!-- Oracle --&gt; &lt;!-- The central database server type (oracle, postgresql, sqleserver   =&gt;sqleserverJdbc   =&gt;sqleserverOdbc   =&gt;sqlServer using the Jdbc JDBC driver) or sqleserverms   =&gt;sqleserver using the Microsoft JDBC driver! --&gt; &lt;!-- Server type=postgresql --&gt;&lt;/dbServerType&gt; &lt;!-- The server name or IP address of the central database server. --&gt; &lt;!-- dbServerName=&gt;localhost   =&gt;dbServerName=delft.fews.nl&lt;/dbServerName&gt; &lt;!-- Optional database port if non-standard. Assumed are 1521 for Oracle, 5432 for PostgreSQL, 1433 for SQL Server. --&gt; &lt;!-- dbServerPort=&gt;5432&lt;/dbServerPort&gt; &lt;!-- The database instance ID. --&gt; &lt;!-- dbInstanceID=&gt;DB1   =&gt;dbInstanceID=delft.fews.nl&lt;/dbInstanceID&gt; &lt;!-- The database user name. --&gt; &lt;!-- dbInstanceUserName=&gt;sa   =&gt;dbInstanceUserName=delft.fews.nl&lt;/dbInstanceUserName&gt; &lt;!-- dbInstancePassword=password&lt;/dbInstancePassword&gt; &lt;!-- Option to produce encrypted password --&gt; &lt;!-- encryptPassword=true&lt;/dbEncryptPassword&gt; &lt;/dbServer&gt; [code]</pre>	Quebec
FEWS17899	App - Master Controller Server, Database	FEWS-16767 Implement deletion of rows using DeletedRows and ProcessedDeletedRows tables (replace marked record manager)	Distributed deletion of rows has been implemented using the new DeletedRows and ProcessedDeletedRows tables.	See also section on RollingBarrel in <a href="https://publicwiki.deltares.nl/display/FEWS2020/Implementation+process">https://publicwiki.deltares.nl/display/FEWS2020/Implementation+process</a> .		Detrars - Roadmaps
FEWS16299	App - Operator Client Gui (Explorer)	FEWS-17266 TVA: ability to minimize unlocked windows				TVA
FEWS16897	App - Operator Client Gui (Explorer)	FEWS-17268 TVA: F12 option to remove cache files without having to restart client manually				TVA
FEWS17052	App - Operator Client Gui (Explorer)	Add re-scale option while using expression filter				GO-FEWS (Selection of Dutch Waterboards)
FEWS18313	App - Operator Client Gui (Explorer)	FEWS-16767 Rolling Barrel implementations SA / OC				Detrars - Roadmaps
FEWS16269	App - Operator Client Gui (Explorer)	FEWS-16767 OC System Monitor: add mc-mc sync metrics				Detrars - Roadmaps
FEWS18242	App - Operator Client Gui (Explorer), Database	FEWS-16767 Remove on demand blob download				Detrars - Roadmaps
FEWS17848	App - Operator Client Gui (Explorer)	FEWS-16132 HERMES: Today Button Zoom to System Cardinal Time in SA				BPA
FEWS17600	App - Operator Client Gui (Explorer)	FEWS-17202 Smart labeling for polylines	smart labeling for line shapelyards	Instead of a single fixed label location, labels for line shapes are now placed at the line and will move along the line when the view window is adjusted. Note: FEWS-17802 allows for this new behavior to be turned off through the layer configuration.		APP
FEWS17599	App - Operator Client Gui (Explorer)	FEWS-17202 Option to make labels invisible	option to make labels invisible in layer selection panel (moved color change options)	When you right-click a layer in the layer selection panel an option will be available to turn off/on the labels for that label (when applicable). The already present functionality to change the fill and line color of layers was moved from the double-click menu to this new right-click menu.		APP
FEWS17598	App - Operator Client Gui (Explorer)	FEWS-17202 Option to show legend for background layer (eg DTM)	layer selection panel is displayed as legend next to map and contains legend images for wms layers	The layer selection panel was moved from a separate drop-down menu to a panel displayed to the right of the map when toggled. For WMS layers a legend image is downloaded and displayed in this panel (when available), similar to how it already contained a legend for layers with classbreaks.		APP
FEWS16969	App - Operator Client Gui (Explorer)	FEWS 64 bit OC starts really slow	known issue: 64b JRE does not contain client caching. Might take longer to startup OC using 64b			Detrars

JIRA Delft-FEWS 2017.02 New Features							
FEWS-17821	App - Operator Client Gui (Explorer)	FEWS-17521 Expand/shrink selection functionality unclear	clearer expand/shrink selection window	More text was added to the expand/shrink selection box, to make the possible entries clearer.			Details
FEWS-17856	App - Operator Client Gui (Explorer)	FEWS-17202 Add button to show last value in explorer	added button to change location labels to map display	Added a drop-down button to the map display to allow selecting whether the last value should be displayed in the labels. The functionality is similar to the label button already present in the spatial / grid display.			NW5
FEWS-17854	App - Operator Client Gui (Explorer)	FEWS language: add Vietnamese as user language (GUI)	add Vietnamese to language options	Language files for Vietnamese were added to FEWS.			Provinces Vietnam
FEWS-18435	App - Operator Client Gui (Explorer)	Store system time in user_settings.ini for SA	Store system time in user settings for Stand Alone	The system time of a stand alone is now stored in and read from the user settings, if and only if <code><adjustSystemTimeAutomatically></adjustSystemTimeAutomatically></code> is set to false. Note that it is the default for most environments. Set this element (found in explorer.xml -> dateTimes-) to true for a stand-alone environment in which the system time should be adjusted to the actual time automatically. For stand-alone environments in which this is set to true, it is important to note that the system time is only changed when adjusted manually, and no longer updated to the current time on start-up. Note that the value stored in the user settings will be overruled if a TO is configured in the global properties.		<a href="https://publicwiki.deltas.nl/display/FEWSDOC/01-NW5-Explorer#id_01FEWSExplorer-adjustSystemTimeAutomatically">https://publicwiki.deltas.nl/display/FEWSDOC/01-NW5-Explorer#id_01FEWSExplorer-adjustSystemTimeAutomatically</a>	Details
FEWS-18416	App - Operator Client Gui (Explorer)	Split location counter (data viewer) in main and sublocations	Location counter in data viewer is split between parent and child locations	When the time navigator toolbar is enabled in the explorer, a location count is shown in the data viewer. This count has now been split in two separate counts: the number of parent locations and the number of child locations.			HDSR
FEWS-17281	App - Operator Client Gui (Explorer)	Embedded PDF viewer default print format A4	Embedded PDF print changed default format from Letter to A4				
FEWS-18398	Configuration	FEWS-14299 IdMap: Allow multi value attributes for parameterFunction					
FEWS-18147	Configuration	Custom hourly timestep at half hours (e.g. 00:30, 01:30, 02:30)	new timestep at specified minutes of each hour	A new possibility for defining a <code>-timestep-</code> was added. The minutes attribute can be used to specify minute offsets for each hour. For example: <code>-timestep minutes="15 50"/> will result in steps at 0:15, 0:50, 1:15, 1:50, etc.	<code>[code-snip]&lt;timestep minutes="15 50"/&gt; &lt;!-- 0:15, 0:50, 1:15, 1:50, etc. --&gt;[code]</code>	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/06-TimedEvents#id_06TimedEventsOtherexamples">https://publicwiki.deltas.nl/display/FEWSDOC/06-TimedEvents#id_06TimedEventsOtherexamples</a>	
FEWS-14983	Configuration	client truststore improvements	client truststore can be configured in the clientConfig.xml	The clientConfig.xml can now be used to explicitly configure the client truststore and client keystore using a custom name and location. If the configured files are not found, a config error will be logged. For backwards compatibility the client truststore and client keystore will still be used if no clientConfig.xml configuration was found.	<code>[code]&lt;xml version="1.0" encoding="UTF-8"&gt;&lt;clientConfigurations&gt;&lt;clientConfig name="DefaultClientConfig" width="100" height="100"&gt;&lt;clientConfigLocation&gt;http://www.widelft.nl/feeweb&lt;/clientConfigLocation&gt;&lt;http://www.widelft.nl/feeweb&lt;/clientConfigName&gt;&lt;password&gt;MySecretPassword&lt;/password&gt;&lt;truststore&gt;&lt;truststoreFile&gt;\${FEWS_HOME}/client/truststore&lt;/truststoreFile&gt;&lt;truststorePassphrase&gt;\${FEWS_HOME}/client/truststorePassphrase&lt;/truststorePassphrase&gt;&lt;keystore&gt;&lt;keystoreFile&gt;\${FEWS_HOME}/client/keystore&lt;/keystoreFile&gt;&lt;keystorePassphrase&gt;\${FEWS_HOME}/client/keystorePassphrase&lt;/keystorePassphrase&gt;&lt;/keystore&gt;&lt;/clientConfig&gt;&lt;/clientConfigurations&gt;&lt;/code&gt;</code>	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/HowToConfigure+Secure+https+connection+to+Matroska">https://publicwiki.deltas.nl/display/FEWSDOC/HowToConfigure+Secure+https+connection+to+Matroska</a>	Details
FEWS-16883	Database	FEWS-16887 NW5: #26827 Sequence table incurred after database rebuild and initial MC_synchronisation					NW5

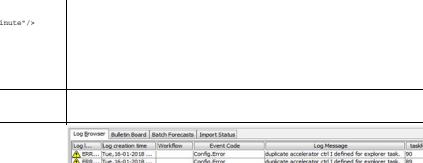

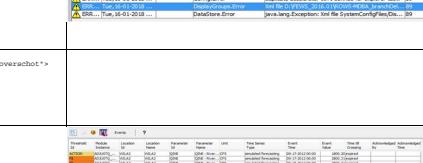

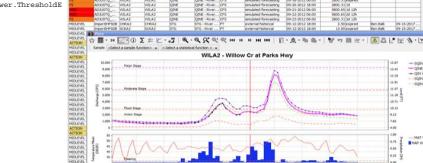

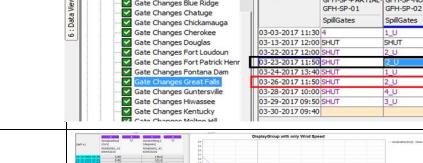

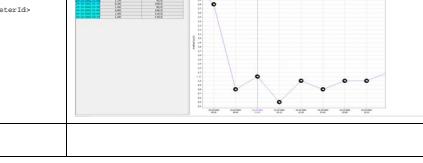

JIRA Delft-FEWS 2017.02 New Features						
FEWS-18365	Database	Expand the taskTag column in the Tasks table to 146 characters so workflow and taskTag do not need to be chopped anymore				Roadmaps
FEWS-17253	Database	FEWS-16767 Create new table ForecastingShells				Roadmaps
FEWS-16876	Database	FEWS-16767 Add globalRowId column to all tables				Roadmaps
FEWS-17642	Database	FEWS-16767 Database time provider in extended datasource				Roadmaps
FEWS-18237	Database	FEWS-16767 Add Integer build number column to log entries table				Roadmaps
FEWS-17975	Database	Optimize Snapshot / Replicate functionality		<pre>[code/xml] &lt;xsd:element name="1.0" encoding="utf-8"&gt;   &lt;xsd:complexType&gt;     &lt;xsd:sequence&gt;       &lt;xsd:element name="archiveModule" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:archiveModule.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportArchiveModule.xsd" /&gt;       &lt;xsd:element name="general" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:general.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportGeneral.xsd" /&gt;       &lt;xsd:element name="archiveFolder" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:archiveFolder.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportArchiveFolder.xsd" /&gt;       &lt;xsd:element name="activities" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:activities.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportActivities.xsd" /&gt;       &lt;xsd:element name="exportShapes" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:exportShapes.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportShapes.xsd" /&gt;       &lt;xsd:element name="areas" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:areas.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportAreas.xsd" /&gt;       &lt;xsd:element name="onlyTimeSeries" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:onlyTimeSeries.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportOnlyTimeSeries.xsd" /&gt;       &lt;xsd:element name="xmlConfig" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:xmlConfig.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportXmlConfig.xsd" /&gt;       &lt;xsd:element name="coldStates" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:coldStates.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportColdStates.xsd" /&gt;       &lt;xsd:element name="moduledataSets" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:moduledataSets.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportModuledataSets.xsd" /&gt;       &lt;xsd:element name="mapLayers" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:mapLayers.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportMapLayers.xsd" /&gt;       &lt;xsd:element name="icons" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:icons.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportIcons.xsd" /&gt;       &lt;xsd:element name="reportTemplates" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:reportTemplates.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportReportTemplates.xsd" /&gt;       &lt;xsd:element name="reportImages" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:reportImages.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportReportImages.xsd" /&gt;       &lt;xsd:element name="simulatedSeries" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:simulatedSeries.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportSimulatedSeries.xsd" /&gt;       &lt;xsd:element name="telemetry" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:telemetry.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportTelemetry.xsd" /&gt;       &lt;xsd:element name="continuousTimeSeries" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:continuousTimeSeries.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportContinuousTimeSeries.xsd" /&gt;       &lt;xsd:element name="manual" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:manual.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportManual.xsd" /&gt;       &lt;xsd:element name="astronomical" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:astronomical.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportAstronomical.xsd" /&gt;       &lt;xsd:element name="climatological" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:climatological.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportClimatological.xsd" /&gt;       &lt;xsd:element name="smallExternalForecast" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:smallExternalForecast.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportSmallExternalForecast.xsd" /&gt;       &lt;xsd:element name="largeExternalForecast" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:largeExternalForecast.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportLargeExternalForecast.xsd" /&gt;       &lt;xsd:element name="grid" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:grid.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportGrid.xsd" /&gt;       &lt;xsd:element name="mausStates" type="http://www.wildft.nl/Fews/2001/XMLSchema-instance:mausStates.xsd" namespace="http://www.wildft.nl/schemas/version1.0/exportMausStates.xsd" /&gt;     &lt;/xsd:sequence&gt;   &lt;/xsd:complexType&gt; &lt;/xsd:element&gt;</pre>	Roadmaps	
FEWS-18432	Database	FEWS-16767 Always use sequences when inserting system activities				Roadmaps
FEWS-17886	Database	Indexing TaskRunCompletion table is slow				D USA
FEWS-18411	Database	FEWS-16767 Connection naming	name all database connections based on component name	name all database connections based on component name		Roadmaps
FEWS-17175	Database	FEWS-16315 Add nullable exportTime column to ThresholdEvent table	The ThresholdEvent table has a new exportTime column.			BoM
FEWS-17754	Database	FEWS-16767 Replaces Sequences table with 4 database sequences	Sequence tables replaced by actual database sequences which are simpler and more efficient	Sequence tables replaced by actual database sequences which are simpler and more efficient		Roadmaps
FEWS-18051	Database	FEWS-14299 FFTS: Add power function to time series rating curves	Rating curve with stageToDischargePowerEquation	<p>stageToDischargePowerEquation represents the equations</p> $\text{discharge} = \text{cr} * (\text{stage} - \alpha)/\beta$ <p>where 'cr' and 'beta' are rating curve constants, and 'alpha' is a constant which represents the stage corresponding to zero discharge.</p> <p>To show the stageToDischargePowerEquation rating curves in the TimeSeriesDisplay, a table is generated on the fly from the power equations.</p> <p>For each equation ten stage values are generated using increment = (maxStage - minStage) / 10, and for each stage a discharge is calculated.</p> <p>Please note that this table is only used in the display and not in TransformationModule computations.</p> <pre>[code/xml] &lt;example from pi_ratingcurves.xml&gt; &lt;ratingCurve&gt;   &lt;header&gt;     &lt;stationName&gt;LocationA&lt;/stationName&gt;     &lt;locationId&gt;1&lt;/locationId&gt;     &lt;startdate&gt;2011-01-01&lt;/startdate&gt;     &lt;enddate&gt;2011-01-01&lt;/enddate&gt;     &lt;stationName&gt;LocationA&lt;/stationName&gt;     &lt;locationId&gt;1&lt;/locationId&gt;     &lt;dischargeUnit&gt;m³/s&lt;/dischargeUnit&gt;   &lt;/header&gt;   &lt;stageToDischargePowerEquation minStage="0.0" maxStage="0.5" cr="0.8605" alpha="0.02757" beta="1.8032"/&gt;   &lt;stageToDischargePowerEquation minStage="0.5" maxStage="1.0" cr="0.8605" alpha="0.02757" beta="1.8032"/&gt;   &lt;stageToDischargePowerEquation minStage="1.0" maxStage="999.0" cr="17.7210" alpha="0.02757" beta="1.8032"/&gt; &lt;/ratingCurve&gt; &lt;/example&gt; &lt;/code&gt;</pre>		EA
FEWS-18238	Database	FEWS-16767 Implement Maintenance Mode	Maintenance mode support	From the admin interface maintenance mode can be started or stopped. When maintenance mode other FEWS components aren't allowed to write to the database.		Roadmaps
FEWS-17101	Debug Tool - Workflow Navigator	WFN should check if all referenced properties are available	WFN check of transformation module expressions	WFN check if the variables and coefficients, mentioned in the expressions, are defined. When any expression variable or coefficient is not defined, then the transformation module node is marked with a red cross. Using menu "Show messages" the pop up that shows the undefined variables and/or coefficients. See picture WFN.png		Roadmaps
FEWS-18635	Documentation	FEWS-17521 Check with ICI-OS what Database recovery mode means				
FEWS-18633	Documentation	FEWS-17521 Check how OC logging is written to, read from and acknowledged from central database				
FEWS-17399	Module Adapter - All	Upgrade wands adapter with new dls				Roadmaps
FEWS-18247	Module Adapter - All	FEWS-16663 Quebec: Hydrotel Adapter	Created pre and post adapter for Hydrotel model			<a href="https://publicwiki.delftworks.nl/page/viewpage.action?gcid=152449418">https://publicwiki.delftworks.nl/page/viewpage.action?gcid=152449418</a> MDDELCC (Quebec)
FEWS-17003	Module Adapter - Calibration	FEWS-16887 NWIS #34172 (b) CHPS Calibration: Maplayers CSV Compatibility for model parameters	Modified location attribute parameters can be visualized in the tabular config file display	Modified location attribute parameters can be visualized in the tabular config file display. Marking the "Show modified values" checkbox will show the changed values and highlight the background in blue. The modified values can be exported to CSV.		NWIS

JIRA Delft-FEWS 2017.02 New Features								
FEWS-17504	Plugin - Gui - Forecast Manager	Forecast management dialog: add extra column with runtime of workflow				National Water Model		
FEWS-17883	Plugin - Gui - Grid Display	FEWS-17145 GridDisplay - Mask (or erase) coarse model results in areas with detailed model results			<pre>[code:xml] &lt;locationSet id="wave_EAM_clipper.shp"&gt; &lt;/earlierShapeFile&gt; &lt;file&gt;wave_EAM_clipper.shp&lt;/file&gt; &lt;id&gt;EAM_Wave&lt;/id&gt; &lt;x&gt;&lt;/x&gt; &lt;y&gt;&lt;/y&gt; &lt;earlierShapeFile&gt; &lt;/locationSet&gt; &lt;code&gt; remove the EAM.Wave from the locations.xml </pre>			
FEWS-16905	Plugin - Gui - Grid Display	FEWS-16887 NWS: #24896 Spatial Display time-slider mapped to moving accumulation time step			<pre>[code:xml] &lt;data&gt; &lt;accumulationTimeStep unit="minute" multiplier="30"/&gt; &lt;accumulationTimeStep unit="hour" multiplier="1"/&gt; &lt;accumulationTimeStep unit="day" multiplier="3" timeZone="CST"/&gt; &lt;accumulationTimeStep unit="month" multiplier="6" timeZone="CST"/&gt; &lt;accumulationTimeStep id="122"/&gt; &lt;classBreaks&gt; &lt;/code&gt; </pre>		NWS	
FEWS-17842	Plugin - Gui - Grid Display	Show time series set locations instead of related in spatial display						
FEWS-17149	Plugin - Gui - Grid Display	Functionality to show a fixed logo at grid product, like EUMETSAT H-SAF	The image file should be placed in the MaplayerFiles directory		<pre>[code:xml] &lt;data&gt; &lt;grid&gt; &lt;id&gt;Precipitation&lt;/id&gt; &lt;timeSeriesSet&gt; &lt;moduleInstanceId&gt;Import_NWP&lt;/moduleInstanceId&gt; &lt;valueType&gt;grid&lt;/valueType&gt; &lt;qualifierId&gt;precipitation_hr&lt;/qualifierId&gt; &lt;locationId&gt;NWP_ALADIN_HR&lt;/locationId&gt; &lt;timeSeriesType&gt;realtime&lt;/timeSeriesType&gt; &lt;timeStep unit="hour"/&gt; &lt;relativeViewPeriod unit="day" start="-5" end="10"/&gt; &lt;readAttribute readOnly="true" mode="read"/&gt; &lt;timeSeriesId&gt; &lt;logos&gt; &lt;image&gt;http://publicwiki.delftware.nl/display/FEWSDOC/01-GD-Display&lt;/image&gt; &lt;position&gt;topRight&lt;/position&gt; &lt;/logos&gt; &lt;contourLineColor&gt;#0000ff&lt;/contourLineColor&gt; &lt;contourLineColorGrey&gt;#cccccc&lt;/contourLineColorGrey&gt; &lt;/grid&gt; &lt;code&gt; </pre>	<a href="http://publicwiki.delftware.nl/display/FEWSDOC/01-GD-Display">http://publicwiki.delftware.nl/display/FEWSDOC/01-GD-Display</a>	FEWS Sava	
FEWS-17837	Plugin - Gui - Grid Display	LastValue checkbox in spatial display default setting	store "last value" checkbox status from spatial display in the user settings	The status of the "last value" checkbox in the spatial display is now stored in the user settings. When FEWS is restarted, the checkbox will still be checked/unchecked like it was when FEWS was exited			APP	
FEWS-17208	Plugin - Gui - Grid Display	FEWS-17202 Make labels of background layers configurable	new label formatting options for shape-layers	For shape-layers (earlierShapeLayer and genericShapeLayer), several new elements are available to format the labels: <ul style="list-style-type: none"> <li>* labelFontSize</li> <li>* labelFontColor</li> <li>* labelBackgroundColor</li> <li>* labelOpacities (opacities of the background color)</li> <li>* labelBorderColor</li> <li>* labelBorderDash</li> <li>* labelAtline (controls whether smart labeling is used for lines, see FEWS-1760)</li> <li>* labelXAttribute &amp; labelYAttribute (allow defining label coordinates in the shape files)</li> </ul>	<pre>[code:xml] &lt;earlierShapeLayer id="myshape1" labelLayer="1"&gt; &lt;file&gt;shapeFile&lt;/file&gt; &lt;label&gt;label1&lt;/label&gt; &lt;labelFontSize&gt;10&lt;/labelFontSize&gt; &lt;labelFontColor&gt;black&lt;/labelFontColor&gt; &lt;labelBackgroundColor&gt;red&lt;/labelBackgroundColor&gt; &lt;labelOpacities&gt;0.5&lt;/labelOpacities&gt; &lt;labelBorderColor&gt;black&lt;/labelBorderColor&gt; &lt;labelBorderDash&gt;solid&lt;/labelBorderDash&gt; &lt;labelAtline&gt;label1XAttribute&lt;/labelAtline&gt; &lt;labelXAttribute&gt;label1XAttribute&lt;/labelXAttribute&gt; &lt;labelYAttribute&gt;label1YAttribute&lt;/labelYAttribute&gt; &lt;fillColor&gt;yellow&lt;/fillColor&gt; &lt;fillOpacities&gt;0.5&lt;/fillOpacities&gt; &lt;fillBorderColor&gt;yellow&lt;/fillBorderColor&gt; &lt;fillBorderDash&gt;solid&lt;/fillBorderDash&gt; &lt;fillOutlineColor&gt;yellow&lt;/fillOutlineColor&gt; &lt;fillOutlineOpacities&gt;0.5&lt;/fillOutlineOpacities&gt; &lt;strokeColor&gt;yellow&lt;/strokeColor&gt; &lt;strokeOpacities&gt;0.5&lt;/strokeOpacities&gt; &lt;strokeWidth value="2"/&gt; &lt;/earlierShapeLayer&gt; &lt;code&gt; </pre>		<a href="https://publicwiki.delftware.nl/display/FEWSDOC/GeoMap-CommonShapeLayerElements">https://publicwiki.delftware.nl/display/FEWSDOC/GeoMap-CommonShapeLayerElements</a>	APP
FEWS-17845	Plugin - Gui - Grid Display	Mousepointer does not show calculation symbol when hovering on map	mouse pointer shows hourglass symbol when hovering over map	The mouse pointer will now show an hourglass symbol when hovering over a calculation symbol, similar to how the hourglass symbol was already shown when hovering outside of the map.			Delftware	
FEWS-17990	Plugin - Gui - Grid Display	FEWS-17202 Enable classification of point layers in geoMap	enable classification for point layers in geoMap	It is now possible to configure a classification for point shapelayers using icons.	<pre>[code:xml] &lt;earlierShapeLayer id="Venlo_Loosingspunten" name="Venlo_Loosingspunten"&gt; &lt;file&gt;Venlo_loosingspunten.shp&lt;/file&gt; &lt;pointIconId&gt;meteo_site_data.gif&lt;/pointIconId&gt; &lt;label&gt;label1&lt;/label&gt; &lt;labelTextColor&gt;black&lt;/labelTextColor&gt; &lt;labelBackgroundColor&gt;white&lt;/labelBackgroundColor&gt; &lt;labelOpacities&gt;0.5&lt;/labelOpacities&gt; &lt;labelBorderColor&gt;black&lt;/labelBorderColor&gt; &lt;labelBorderDash&gt;solid&lt;/labelBorderDash&gt; &lt;labelAtline&gt;label1XAttribute&lt;/labelAtline&gt; &lt;labelXAttribute&gt;label1XAttribute&lt;/labelXAttribute&gt; &lt;labelYAttribute&gt;label1YAttribute&lt;/labelYAttribute&gt; &lt;fillColor&gt;blue&lt;/fillColor&gt; &lt;fillOpacities&gt;0.5&lt;/fillOpacities&gt; &lt;fillBorderColor&gt;blue&lt;/fillBorderColor&gt; &lt;fillBorderDash&gt;solid&lt;/fillBorderDash&gt; &lt;strokeColor&gt;blue&lt;/strokeColor&gt; &lt;strokeOpacities&gt;0.5&lt;/strokeOpacities&gt; &lt;strokeWidth value="2"/&gt; &lt;/earlierShapeLayer&gt; &lt;code&gt; </pre>		<a href="https://publicwiki.delftware.nl/display/FEWSDOC/GeoMap-CommonShapeLayerElements">https://publicwiki.delftware.nl/display/FEWSDOC/GeoMap-CommonShapeLayerElements</a>	APP

 JIRA Delft-FEWS 2017.02 New Features

FEWS-17986	Plugin - Gui - Grid Display	FEWS-17202 Add MapExtentId to Gridplot	couple zoom extent to grid plot	It is now possible to configure a mapExtentId for grid plots, the map will then automatically select the configured zoom extent when the grid plot is selected in the spatial display. The mapExtentId can be coupled to specific grid plots or defaults can be used to configure the mapExtentId for several grid plots at once.	<pre>&lt;code&gt;&lt;xml&gt; &lt;gridPlot id="RainfallAllSheep"/&gt; &lt;mapExtentId="New South Wales"/&gt;&lt;mapExtentId&gt; &lt;/mapExtentId&gt; &lt;/gridPlot&gt; &lt;gridPlot id="Peellschaal" name="Peellschaal"&gt; &lt;mapExtentId="Ambid"/&gt;&lt;mapExtentId&gt; &lt;/mapExtentId&gt; &lt;circleMarkerSize&gt;1&lt;/circleMarkerSize&gt; &lt;timeSeriesId&gt; &lt;moduleInstanceID&gt;process_WWWC_auto&lt;/moduleInstanceID&gt; &lt;valueType&gt;scalar&lt;/valueType&gt; &lt;parameterId&gt;WL_obs&lt;/parameterId&gt; &lt;locationSetId&gt;NL_obs&lt;/locationSetId&gt; &lt;timeSeriesType&gt;external historical&lt;/timeSeriesType&gt; &lt;timestep id="Week"/&gt; &lt;start&gt;2010-01-01&lt;/start&gt; &lt;end&gt;2010-01-01&lt;/end&gt; &lt;startOverdueable&gt;true&lt;/startOverdueable&gt; &lt;readWriteMode&gt;readWriteMode&lt;/readWriteMode&gt; &lt;/timeSeriesId&gt; &lt;classBreaksId&gt;WaterLevel&lt;/classBreaksId&gt; &lt;/gridPlot&gt; &lt;/code&gt;</pre>	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display">https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display</a>	Deltas
FEWS-17850	Plugin - Gui - Grid Display	FEWS-17145 GridDisplay configuration optimization using multiple grid partitions	When Dflow FM model results have been imported for multiple computational domains, the 2D or 3D data can be displayed in Grids.xml by making use of a LocationSet containing all partition locationids.	When 2D or 3D data is imported using multiple domain partitions, this data can be displayed in Grids.xml making use of LocationSets. Create a LocationSet including the LocationId for all partitions. This LocationSet can be used consistently throughout the gridDisplay configuration, like when displaying:  • 2D data, e.g. water level • 3D data, e.g. a combination of uTimeSeriesSet, vTimeSeriesSet and sigmaScaleReferenceTimeSeriesSet • 3D data, e.g. a combination of timeSeriesSet (e.g. temperature) and sigmaScaleReferenceTimeSeriesSet	<pre>&lt;gridPlot id="3D_data" name="3D data display"&gt; &lt;data&gt; &lt;arrowColor&gt;white&lt;/arrowColor&gt; &lt;arrowSymbol&gt;&lt;arrowSymbol&gt; &lt;multipleArrowsPerValue&gt;false&lt;/multipleArrowsPerValue&gt; &lt;timeSeriesId&gt; &lt;moduleInstanceID&gt;DFLOWPM_9&lt;/moduleInstanceID&gt; &lt;valueType&gt;grid&lt;/valueType&gt; &lt;parameterId&gt;C_simulated_u&lt;/parameterId&gt; &lt;locationSetId&gt;DFLOWPM_9&lt;/locationSetId&gt; &lt;timeSeriesType&gt;simulated forecasting&lt;/timeSeriesType&gt; &lt;timestep unit="none" id="instant"&gt; &lt;readWriteMode&gt;read complete forecast&lt;/readWriteMode&gt; &lt;/timestep&gt; &lt;/timeSeriesId&gt; &lt;timeSeriesId&gt; &lt;moduleInstanceID&gt;DFLOWPM_9&lt;/moduleInstanceID&gt; &lt;valueType&gt;grid&lt;/valueType&gt; &lt;parameterId&gt;C_simulated_v&lt;/parameterId&gt; &lt;locationSetId&gt;DFLOWPM_9&lt;/locationSetId&gt; &lt;timeSeriesType&gt;simulated forecasting&lt;/timeSeriesType&gt; &lt;timestep unit="none" id="instant"&gt; &lt;readWriteMode&gt;read complete forecast&lt;/readWriteMode&gt; &lt;/timestep&gt; &lt;/timeSeriesId&gt; &lt;timeSeriesId&gt; &lt;moduleInstanceID&gt;DFLOWPM_9&lt;/moduleInstanceID&gt; &lt;valueType&gt;grid&lt;/valueType&gt; &lt;parameterId&gt;C_simulated_w&lt;/parameterId&gt; &lt;locationSetId&gt;DFLOWPM_mergd&lt;/locationSetId&gt; &lt;timeSeriesType&gt;simulated forecasting&lt;/timeSeriesType&gt; &lt;timestep unit="none" id="instant"&gt; &lt;readWriteMode&gt;read complete forecast&lt;/readWriteMode&gt; &lt;/timestep&gt; &lt;/timeSeriesId&gt; &lt;/dataLayer&gt; &lt;br/&gt; &lt;position&gt;right&lt;/position&gt; &lt;width&gt;50&lt;/width&gt; &lt;/gridPlot&gt;</pre>	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display">https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display</a>	Deltas
FEWS-18289	Plugin - Gui - Grid Display	FEWS-17145 Hide "Last Value" box in grid display when not applicable	Added configuration option to hide the last value checkbox in the GridDisplay	The last value checkbox in the GridDisplay can now be hidden through configuration. Documentation on the new configuration option and the functionality of the last value checkbox was added to the wiki.		<a href="https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display">https://publicwiki.deltas.nl/display/FEWSDOC/01+Grid+Display</a>	RWS
FEWS-17973	Plugin - GUI - IFD - Forecaster Help	List of 'Product' doesn't refresh after a task/node has finished running	Forecaster help selection panel selection panel is improved	The forecaster help selection panel gives an overview of the files which are available for a certain topology node help the forecaster. After selection of a file the content can be displayed in the forecaster help documentation panel. It is possible to show the content of multiple folders for each separate node. If the content of these folders is changed the selection panel will now always refresh its content.			RWS
FEWS-17281	Plugin - Gui - Map	FEWS-14893 FOEN-DEV: Add feature to disable threshold icons in Filters and Map display	new button in the map display which can disable threshold icons	A new button was added to the map display to turn the threshold icons for the locations on and off. Turning the threshold icons off allows the validation icons to become visible.			FOEN
FEWS-18286	Plugin - Gui - Map, Plugin - Module - Reports	FEWS-17145 Link location-specific reports to Map viewer	Added option to link a report to locations	Locations can now be linked to a specific report. When a location-specific report is selected, the linked report will automatically open in the same ForecasterHelpSelectionPanel. Note that the report must already be present in the list of reports in this panel. Information on the configuration of these feature is available on the wiki.		<a href="https://publicwiki.deltas.nl/display/FEWSDOC/01+Forecaster+Aux+Selection+Panel">https://publicwiki.deltas.nl/display/FEWSDOC/01+Forecaster+Aux+Selection+Panel</a>	
FEWS-18214	Plugin - Gui - Schematic Status Display	FEWS-17521 Context menu - save as - error when extension not entered					Deltas
FEWS-16812	Plugin - Gui - Schematic Status Display	SSD, switching between panels with different timestep causes loss of time definition	Time slider activation button can be configured to toggle between active and inactive time navigator	When the time navigator is set to inactive, the behaviour is equal to the case where no navigator toolbar was configured at all.	<pre>&lt;code&gt; &lt;showTimeNavigatorToolbar&gt; &lt;timestepRelativePeriod unit="day" start="-30" end="0"/&gt; &lt;timeNavigatorActivation&gt;activate&lt;/timeNavigatorActivation&gt; &lt;timeNavigatorActivationOnToggle&gt;true&lt;/timeNavigatorActivationOnToggle&gt; &lt;/showTimeNavigatorToolbar&gt; &lt;/code&gt;</pre>	<a href="https://publicwiki.deltas.nl/pages/viewpage.action?pageId=6884026">https://publicwiki.deltas.nl/pages/viewpage.action?pageId=6884026</a>	RWS (NL)

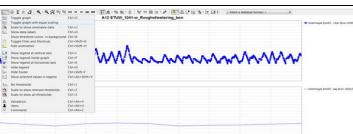

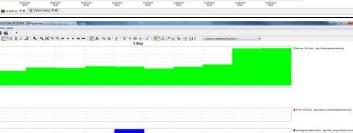

## XJIRA Delft-FEWS 2017.02 New Features

FEWS-11490	Plugin - Gui - Schematic Status Display	Configurable schematic status display background color	Schematic Status Display can have a custom background color. The colors can be colorscheme dependent. A panel level color can be defined on the display level, that will apply to all panels in the display. On the panel level a color can be defined as well to override the color on the display level.	<pre>&lt;example&gt; &lt;!--Schematic Status Display can have a custom background color. The colors can be colorscheme dependent.--&gt; &lt;!--A panel level color can be defined on the display level, that will apply to all panels in the display. On the panel level a color can be defined as well to override the color on the display level.--&gt;</pre>		<a href="https://publicwiki.deltars.nl/pages/viewpage.action?pageId=8684020">https://publicwiki.deltars.nl/pages/viewpage.action?pageId=8684020</a>	IWP
FEWS-18173	Plugin - Gui - Schematic Status Display	Use of attributes in SSD the 'title' of the 'leftSingleClickAction'	PARAMETER tag and LOCATIONATTRIBUTE tag SSD improvements	PARAMETER tag and LOCATIONATTRIBUTE tag SSD improvements		<a href="https://publicwiki.deltars.nl/pages/viewpage.action?pageId=8684020">https://publicwiki.deltars.nl/pages/viewpage.action?pageId=8684020</a>	RWS - MVP
FEWS-18080	Plugin - Gui - System Monitor	FEWS-14730 System Monitor Display. Import status tab - highlight selected row	System Monitor Display. Import status tab - highlight selected row	If rows are selected in the table of the import status tab in the system Monitor Display, they are now highlighted.			MDBA
FEWS-18418	Plugin - Gui - Schematic Status Display. Plugin - Gui - Threshold Display	Set transparency of svg elements based on a timeseries opacitiesPercentage available for ThresholdWarningLevels	In the ThresholdWarningLevels.xml it is now possible to configure a opacitiesPercentage. Default a value is set to 100%.	<pre>&lt;!--ThresholdWarningLevel id="4" name="Afvoer is positief, overschat"&gt; &lt;!--color:green;--&gt; &lt;opacitiesPercentage&gt;20&lt;/opacitiesPercentage&gt;</pre>			RWS
FEWS-16092	Plugin - Gui - Threshold Display	FEWS-17264 System wide threshold crossing display with action acknowledge functionality	Display that shows table like overview of all Threshold Events	User manual is documented under link <a href="https://publicwiki.deltars.nl/display/FEWSDOC/29-System-Wide-Thresholds-Display">https://publicwiki.deltars.nl/display/FEWSDOC/29-System-Wide-Thresholds-Display</a>		<a href="https://publicwiki.deltars.nl/display/FEWSDOC/29-System-Wide-Thresholds-Display">https://publicwiki.deltars.nl/display/FEWSDOC/29-System-Wide-Thresholds-Display</a>	TVA
FEWS-11708	Plugin - Gui - Time Series	FEWS-17266 TVA: ability to auto-sort times when editing non-equidistant data					TVA
FEWS-16981	Plugin - Gui - Time Series	HVK: Timeseries Marker as icon (for displaying wind direction as arrow)		<pre>&lt;!--markerIcon&gt;arrow_icon_teal.png&lt;/markerIcon--&gt;</pre>			HHS Delfland
FEWS-17193	Plugin - Gui - Time Series	FEWS-16132 HERMES: show single day (0-23hr) in the 24h display irrespective of hour of the day f897					BPA HERMES

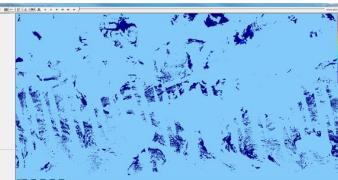

JIRA Delft-FEWS 2017.02 New Features

FEWS-17364	Plugin - Gui - Time Series	FEWS-16132 ability to configure colors of table headers for specific timeseries	table column header background color	It's now possible to configure a tableHeaderBackgroundColor in the parameterDisplayOptions of the timeSeriesDisplay xml to have a custom background color. It's also possible to use a color that has been defined in the color schemes.	<pre>&lt;code&gt;&lt;parameterDisplayOptions name="Q_Obs"&gt; &lt;tableHeaderBackgroundColor&gt;#00FFFF&lt;/tableHeaderBackgroundColor&gt; &lt;/parameterDisplayOptions&gt;&lt;/timeseries&gt; &lt;markerStyle&gt;x&lt;/markerStyle&gt; &lt;markerSize&gt;10&lt;/markerSize&gt; &lt;markerColor&gt;black&lt;/markerColor&gt; &lt;scaleUnit&gt;1&lt;/scaleUnit&gt; &lt;tableHeaderBackgroundColor&gt;#00FFFF&lt;/tableHeaderBackgroundColor&gt; &lt;/timeseriesDisplayOptions&gt; &lt;/code&gt;</pre> <p>In the CustomColors.xml the HLR_Blue color has been defined:</p> <pre>&lt;code&gt;&lt;customColorKey key="HLR_blue" color="light blue"/&gt; &lt;/code&gt;</pre>	<table border="1"> <thead> <tr> <th>PST/PDT</th> <th>A</th> <th>B</th> </tr> </thead> <tbody> <tr> <td>11-09-2013 16:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 17:00</td> <td>10.7</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 18:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 19:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 20:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 21:00</td> <td>10.5</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 22:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 23:00</td> <td>10.5</td> <td>3.6</td> </tr> <tr> <td>11-09-2013 24:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 01:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 02:00</td> <td>10.7</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 03:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 04:00</td> <td>10.5</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 05:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 06:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 07:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 08:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 09:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 10:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 11:00</td> <td>10.6</td> <td>3.6</td> </tr> <tr> <td>11-10-2013 12:00</td> <td>10.6</td> <td>3.7</td> </tr> </tbody> </table>	PST/PDT	A	B	11-09-2013 16:00	10.6	3.6	11-09-2013 17:00	10.7	3.6	11-09-2013 18:00	10.6	3.6	11-09-2013 19:00	10.6	3.6	11-09-2013 20:00	10.6	3.6	11-09-2013 21:00	10.5	3.6	11-09-2013 22:00	10.6	3.6	11-09-2013 23:00	10.5	3.6	11-09-2013 24:00	10.6	3.6	11-10-2013 01:00	10.6	3.6	11-10-2013 02:00	10.7	3.6	11-10-2013 03:00	10.6	3.6	11-10-2013 04:00	10.5	3.6	11-10-2013 05:00	10.6	3.6	11-10-2013 06:00	10.6	3.6	11-10-2013 07:00	10.6	3.6	11-10-2013 08:00	10.6	3.6	11-10-2013 09:00	10.6	3.6	11-10-2013 10:00	10.6	3.6	11-10-2013 11:00	10.6	3.6	11-10-2013 12:00	10.6	3.7	BPA HERMES

JIRA Delft-FEWS 2017.02 New Features

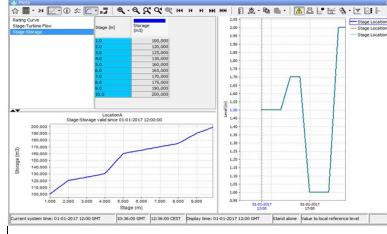

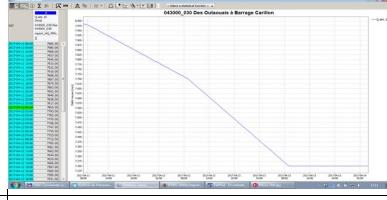

FEWS-17315	Plugin - Gui - Time Series	Add functionality to scatter plot to show multiple parameters for single location	Option to show "ShowAsScatterPlot" for the displayGroups is extended	If it is possible to define a scatterplot for a certain node in the display groups. This was already possible in the previous releases by using the showsAsScatterPlot option. However the same feature always paired my multiple parameters. Now it is possible to have a set of time series were defined for a certain node that of time series with the same parameter were always compared in the scatter plot. Since the 201702 release it is now also possible to create pairs by matching the location. This can be done by setting the option createPairsByMatchingParameter to false.	<pre>&lt;displayGroup name="Verification_parameters_scatter"&gt; &lt;display name="Verification_parameters_scatter"&gt; &lt;plotId&gt;ScatterPlot&lt;/plotId&gt; &lt;locationId&gt;victoriedam&lt;/locationId&gt; &lt;plotId&gt;ScatterPlot&lt;/plotId&gt; &lt;chartTitle&gt;Scatter plot&lt;/chartTitle&gt; &lt;chartType&gt;My scatter plot&lt;/chartType&gt; &lt;createPairs&gt;true&lt;/createPairs&gt; &lt;createPairsByMatchingParameter&gt;false&lt;/createPairsByMatchingParameter&gt; &lt;showAsScatterPlot&gt;&lt;/showAsScatterPlot&gt; &lt;/display&gt;</pre>	RWS
FEWS-17862	Plugin - Gui - Time Series	Button "return to default"	Explorer file menu option "Reload default user settings"	The user may modify the preferences in the OC Gui. For example changing colors or switching TimeSeriesDisplay to daily or monthly. These preferences are stored in user_settings.ini. File menu option "Reload default user settings" restarts FEWS with the default settings again. The previously entered user preferences are removed.		RWS
FEWS-15730	Plugin - Gui - Time Series	Add option to use identical vertical scales in timeseries viewer in 'multi-panel' mode	Added option to use identical vertical scales in graphs	The time series display already contained the option "toggle graph" to display each time series in a separate graph. A second option "toggle graph with equal scaling" was added. When this button is used, time series which were shown in the same graph originally, will use the same scale on the y-axis.		Office of Public Works, Ireland
FEWS-17926	Plugin - Gui - Time Series	Add configuration option for whitespace between (sub)plots	Add configuration option for whitespace between (sub)plots	The subplot element in displayGroups.xml now has an element <code>plotSeparatorWeight</code> (in addition to the <code>plotWeight</code> element) which controls the amount of whitespace above the subplot. For example, if two subplots are configured and the first subplot, second subplot and separator of the second subplot are all given equal weight, each will occupy 1/3 of the screen.		HES Delfland
FEWS-18223	Plugin - Gui - Time Series Modifier, System - Workflow	FEWS-18222 HyFS: Dynamic selection of catchments	Workflow activity option "enabled"	If the option "enabled" is present and the location attribute, specified with attributeId, has value FALSE, then the activity will be excluded from the workflow run. AttributeId should refer to the boolean attribute To ignore interactively the attribute value, use location attribute modifiers.	<pre>&lt;example&gt; from Workflow.wml &lt;/example&gt; &lt;code&gt;&lt;wml&gt; &lt;activity&gt; &lt;properties&gt; &lt;string key="CATCHMENT" value="goulburn"/&gt; &lt;boolean key="enabled" value="true"/&gt; &lt;enabled locationId="hunter_goulburn" attributeId="INCLUDE_IN_MERGEFLOW" /&gt; &lt;runIndependent&gt;true&lt;/runIndependent&gt; &lt;moduleConfig1&gt;goulburn_BairdAll_Multi_Scen_Forecast&lt;/moduleConfig1&gt; &lt;moduleConfig2&gt;goulburn_BairdAll_Multi_Scen_Forecast&lt;/moduleConfig2&gt; &lt;moduleConfig3&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig3&gt; &lt;/enabled&gt; &lt;activity&gt; &lt;properties&gt; &lt;string key="CATCHMENT" value="goulburn"/&gt; &lt;boolean key="enabled" value="true"/&gt; &lt;enabled locationId="hunter_goulburn" attributeId="INCLUDE_IN_MERGEFLOW" /&gt; &lt;runIndependent&gt;true&lt;/runIndependent&gt; &lt;moduleConfig1&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig1&gt; &lt;moduleConfig2&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig2&gt; &lt;moduleConfig3&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig3&gt; &lt;/enabled&gt; &lt;/activity&gt; &lt;/activity&gt; &lt;properties&gt; &lt;string key="CATCHMENT" value="goulburn"/&gt; &lt;boolean key="enabled" value="true"/&gt; &lt;enabled locationId="hunter_goulburn" attributeId="INCLUDE_IN_MERGEFLOW" /&gt; &lt;runIndependent&gt;true&lt;/runIndependent&gt; &lt;moduleConfig1&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig1&gt; &lt;moduleConfig2&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig2&gt; &lt;moduleConfig3&gt;goulburn_WBSC_Catchment_Forecast&lt;/moduleConfig3&gt; &lt;/enabled&gt; &lt;/activity&gt; &lt;/activity&gt; &lt;/wml&gt;&lt;/code&gt;</pre>	BoM

JIRA Delft-FEWS 2017.02 New Features						
FEWS-14937	Plugin - Gui - Time Series Modifier	FEWS-14887 NWS. #23388 Order of available time series types in the Create mod menu's sub-menu should be configurable	The order of the parameters in the submenu of the "create modifier" button dropdownlist is now configurable	When a time-series modifier can be applied to multiple parameters the parameter can be selected from a sub menu in the drop down list of the "create modifier"-button. The parameters are sorted alphabetically. It is now possible to configure the order of the parameters in the modifierDisplayConfig.xml	<pre>&lt;dropDownMenuDisplayOrder&gt; &lt;modifier id="irichmg"&gt; &lt;modifier id="waddmg"&gt; &lt;parameterId=SQIN&lt;/parameterId&gt; &lt;parameterId=STDG&lt;/parameterId&gt; &lt;/modifier&gt; &lt;/dropDownMenuDisplayOrder&gt;</pre>	NWS
FEWS-14902	Plugin - Gui - Time Series Modifier	FEWS-14887 NWS. #23387 Order of mods in drop-down menu should be configurable	Order of the modifiers in the drop down list of the "create modifier" button is now configurable	By default the list of modifiers in the drop-down menu of the "create modifier" button are sorted alphabetically. It is now possible to configure this order in the modifierDisplay.xml. It is not necessary to configure the order for all modifiers. These modifiers will add to the list alphabetically.	<pre>&lt;dropDownMenuDisplayOrder&gt; &lt;modifier id="wedmg"&gt; &lt;modifier id="waddmg"&gt; &lt;/dropDownMenuDisplayOrder&gt;</pre>	NWS
FEWS-14443	Plugin - Gui - Time Series Modifier	FEWS-14471 Add modifier for "Staumatrix fulien" (p2)	New Modifier added using referenceColumns	<pre>Example from ModifierTypes.xml &lt;code&gt;&lt;/code&gt; &lt;highLowRangeSelectionModifier id="staumatrix1" name="StauMatrix1"&gt; &lt;modifierColumn name="Modifier"&gt; &lt;moduleId&gt;ImportStaumatrix&lt;/moduleId&gt; &lt;moduleInstanceId&gt;ImportStaumatrix&lt;/moduleInstanceId&gt; &lt;parameterId&gt;Surge&lt;/parameterId&gt; &lt;qualifierId&gt;Default&lt;/qualifierId&gt; &lt;timeSeries&gt; &lt;/timeSeries&gt; &lt;/modifierColumn&gt;  &lt;referenceColumn name="ModelA"&gt; &lt;moduleId&gt;ImportStaumatrix&lt;/moduleId&gt; &lt;moduleInstanceId&gt;ImportStaumatrix&lt;/moduleInstanceId&gt; &lt;parameterId&gt;Surge&lt;/parameterId&gt; &lt;qualifierId&gt;ModelA&lt;/qualifierId&gt; &lt;timeSeries&gt; &lt;/timeSeries&gt; &lt;/referenceColumn&gt;  &lt;referenceColumn name="ModelB"&gt; &lt;timeSeries&gt; &lt;moduleId&gt;ImportStaumatrix&lt;/moduleId&gt; &lt;moduleInstanceId&gt;ImportStaumatrix&lt;/moduleInstanceId&gt; &lt;parameterId&gt;Surge&lt;/parameterId&gt; &lt;qualifierId&gt;ModelB&lt;/qualifierId&gt; &lt;timeSeries&gt; &lt;/timeSeries&gt; &lt;/referenceColumn&gt;  &lt;referenceColumn name="ModelC"&gt; &lt;timeSeries&gt; &lt;moduleId&gt;ImportStaumatrix&lt;/moduleId&gt; &lt;moduleInstanceId&gt;ImportStaumatrix&lt;/moduleInstanceId&gt; &lt;parameterId&gt;Surge&lt;/parameterId&gt; &lt;qualifierId&gt;ModelC&lt;/qualifierId&gt; &lt;timeSeries&gt; &lt;/timeSeries&gt; &lt;/referenceColumn&gt;  &lt;autoCommitCallNumberSelection&gt; &lt;includeInPlot&gt; &lt;/includeInPlot&gt; &lt;/autoCommitCallNumberSelection&gt;</pre>	<a href="https://publicwiki.deltares.nl/display/FEWSNL/04--Staumatrix+fulien">https://publicwiki.deltares.nl/display/FEWSNL/04--Staumatrix+fulien</a>	BSH
FEWS-14655	Plugin - Gui - Time Series Modifier	FEWS-17346 TVA: ability to combine MAP modifiers when editing in plots	Merge multiple small time series modifiers into a single modifiers	Normally when a forecaster makes multiple small changes to a time series then this will result in multiple modifiers. With this new option it is possible to merge these small mods automatically into 1 single mod. The automated merging will only be done for new uncommitted time series modifiers which edit the same time series.	<pre>&lt;code&gt;&lt;timeSeriesModifier id="my_mod" name="My modifier"&gt; &lt;timeSeries&gt; &lt;parameterId&gt; parameter&lt;/parameterId&gt; &lt;mergeOnCommittedModifiers&gt;true&lt;/mergeOnCommittedModifiers&gt; &lt;defaultStartTime&gt;start run&lt;/defaultStartTime&gt; &lt;defaultEndTime&gt;end run&lt;/defaultEndTime&gt; &lt;createInWorkflow&gt;true&lt;/createInWorkflow&gt; &lt;createInLotus&gt;true&lt;/createInLotus&gt; &lt;/timeSeries&gt; &lt;/timeSeriesModifier&gt; &lt;/code&gt;</pre>	TVA
FEWS-17503	Plugin - Gui - What-if Scenario, Plugin - Module - Archive	use custom properties in archive export for what-if name	Applied what-if scenarios are now stored in the archive	When a forecast is exported to the archive and a what-if scenario was applied to one of the time series which is part of the exported data set the applied what-if scenario(s) will be added to the runinfo.xml in the archive. The harvester of geonetwerk will also add this information to the geonetwerk archive.		National Water Model
FEWS-16241	Plugin - Module - Amalgamate	FEWS-10616 TVA, maintain edit meta data in tss data history after amalgamating				TVA
FEWS-18406	Plugin - Module - Archive	FEWS-17145 Archive 3D Scalar profile data to NetCDF				

JIRA Delft-FEWS 2017.02 New Features						
FEWS-17144	Plugin - Module - Archive	FEWS-17145 On-the-fly generation of regular NetCDF-GRID file based on bbox and viewperiod from Archive				
FEWS-17289	Plugin - Module - Data Export	FEWS-12539 Add to generalCSV export option to deal with enumeration values		<pre>[code/xml] &lt;!--&gt; &lt;exportType&gt;generalCSV&lt;/exportType&gt; &lt;folders&gt;EXPORT_GENERAL&lt;/folders&gt; &lt;exportFileNames&gt;     &lt;exportFileName&gt;GeneralCSV.csv&lt;/name&gt;     &lt;/exportFileName&gt; &lt;/exportFileNames&gt; &lt;table&gt;     &lt;locationColumn name="Date/Time" pattern="yyyy-MM-dd HH:mm"/&gt;     &lt;locationColumn name="Location"/&gt;     &lt;parameterColumn name="Parameter"/&gt;     &lt;valueColumn name="ValueOnly" ignoreForNumericalParameters="true"/&gt;     &lt;valueColumn name="LabelOnly" ignoreForNumericalParameters="true"/&gt;     &lt;unitColumn name="Unit"/&gt; &lt;/table&gt; &lt;idMapId&gt;GeneralCsv&lt;/idMapId&gt; &lt;exportAssignKeyString&gt;/ convertValuesToEnumerationLabels=true&lt;/convertValuesToEnumerationLabels&gt; &lt;/general&gt; &lt;/code&gt;</pre>	<a href="https://publicwiki.deltares.nl/display/FEWSDOC/GeneralCSV-report">https://publicwiki.deltares.nl/display/FEWSDOC/GeneralCSV-report</a>	NZV
FEWS-17546	Plugin - Module - Data Export	FEWS-17145 Export 3D Z Layer to NetCDF (GA export)	NETCDF-OF_ZLAYER time series export	<p>NETCDF-OF_ZLAYER exports scalar time series as Z-layers.</p> <p>Scalar time series at the same geo point. If two different XY are considered to be a Z-layer. All available Zs are used to create a Z-axis (layer axis) in the NetCDF file, and the time series values are written to the associated Z element.</p> <p>An example:</p> <pre>float salinity(time=5, node=26, z=40);</pre> <p>Values of Z axes are stored in meters.</p> <p>Per parameter only one Z-axis is allowed. Different parameters may have different Z-axis</p> <p>Z-axis values are sorted in ascending order.</p> <p>The number of stations in the nc file equals to the number of unique XY that are available in the scalar time series. The location id's/names associated with the first (lowest) Z are written to the nc file as station id's/names. If there are parent locations configured, then the lidMap can be used to write the parent locations id's to the nc file (see config example)</p> <p>The long_name attribute of the parameters is equal to the parameter id by default.</p> <p>However, if the default long_name, configure parameter description in the parameters. The parameter description will then be written to the nc file as long_name.</p> <p>Usage NETCDF-OF_ZLAYER in GeneralAdapter: To export scalar time-series as Z_layers in GA, use option &lt;code&gt;option_zlayer=true&lt;/code&gt; in GA.</p>		
FEWS-17154	Plugin - Module - Data Export	FEWS-16887 NWIS #35088 FEWS HEC DSS Export/Import	Import and export for time series data from files in Hydrologic Engineering Center Data Storage System	<p>Import and export for time series data from files in Hydrologic Engineering Center Data Storage System (HEC-DSS). These files were already used in HEC-XXX models and their FEWS adapters.</p> <pre>[code/xml] &lt;!--&gt; &lt;timeSeriesExportRun xmlns="http://www.wldelft.nl/fews" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://www.wldelft.nl/fews http://www.wldelft.nl/schema/version1_0/timeSeriesExportRun.xsd"&gt; &lt;export&gt; &lt;general&gt; &lt;exportType&gt;HecDSS&lt;/exportType&gt; &lt;folders&gt;EXPORT_FOLDERHEC&lt;/folders&gt; &lt;exportFileName&gt; &lt;name&gt;exportInstant.dss&lt;/name&gt; &lt;version&gt;1&lt;/version&gt; &lt;/exportFileName&gt; &lt;/general&gt; &lt;timeSeriesSet&gt; &lt;timeSeriesSetId&gt;HecDSS/modulalinstanceId&lt;/timeSeriesSetId&gt; &lt;valueType&gt;scalar&lt;/valueType&gt; &lt;parameterId&gt;SH_max&lt;/parameterId&gt; &lt;start&gt;-100&lt;/start&gt; &lt;end&gt;0&lt;/end&gt; &lt;timeSeriesType&gt;external historical&lt;/timeSeriesType&gt; &lt;timeStep unit="minute" multiplier="10"/&gt; &lt;timeStep unit="second" multiplier="1000" start="-100" end="0"/&gt; &lt;relativeViewPeriod&gt; &lt;readMode&gt;add originals&lt;/readMode&gt; &lt;writeMode&gt;add&lt;/writeMode&gt; &lt;/relativeViewPeriod&gt; &lt;/export&gt; &lt;/timeSeriesExportRun&gt; &lt;/code&gt;</pre> <p>WIKI: <a href="https://publicwiki.deltares.nl/pages/viewpage.action?pageId=130383980">https://publicwiki.deltares.nl/pages/viewpage.action?pageId=130383980</a></p> <p>Config for Hec Dss import</p> <p>IDMap is needed for import when location and/or parameter id in FEWS is not in capital letters. HecDss always uses Capital letters.</p>	<a href="https://publicwiki.deltares.nl/display/FEWSDOC/HecDSSImport">https://publicwiki.deltares.nl/display/FEWSDOC/HecDSSImport</a>	NWIS

FEWS-17802	Plugin - Module - Data Import	API Import TAHMO	Import TAHMO	Added a new import type TAHMO.		<a href="https://publicwiki.deltarein.nl/display/FEWSDOC/TAHMO+import">https://publicwiki.deltarein.nl/display/FEWSDOC/TAHMO+import</a> Tanzania																											
FEWS-17484	Plugin - Module - Data Import	FEWS-17202 New Import type: In-Situ Rugged Troll	Timeseries import supports gotoLineWhichStartsWith option to skip lines until configured starts with string is found	Timeseries import supports gotoLineWhichStartsWith option to skip lines until configured starts with string is found. Useful in case the start of CSV headers is variable.		<a href="https://publicwiki.deltarein.nl/display/FEWSDOC/general+CSV+General+CSV+ExamplegotoLineWhichStartsWithSince2016.02">https://publicwiki.deltarein.nl/display/FEWSDOC/general+CSV+General+CSV+ExamplegotoLineWhichStartsWithSince2016.02</a> APP																											
FEWS-18532	Plugin - Module - Data Import	FEWS-17145 Add fileNameObservationDateTimePattern to NETCDF_GRID import from OpenDAP	TimeSeriesImport from OpenDAP can use fileNameObservationDateTimePattern	<p>When OpenDAP NC datasets does not contain any event time, and the dataset time is available in the URL then the observationDateTimePattern can be used to obtain date and time from the URL.</p> <p>Symbol ? can be used if the part of URL is variable, however the number of ? must match the actual number of characters in the URL. This is useful if the configured URL is a catalog. Please note that catalog should be a XML document.</p> <pre>[code:xml] &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;  &lt;!--general--&gt; &lt;importType&gt;NETCDF-CF_GRID&lt;/importType&gt;</pre>																													
FEWS-16898	Plugin - Module - Data Import	FEWS-16887 NWS: #32624 Enhancement request for updates to SHEF imports	SHEF import supports multiparameter lines and continuations	The SHEF import now has support for multiple parameters on one line using the A code. The continuations (A1, A2 etc.) are supported as well.		<a href="https://publicwiki.deltarein.nl/display/FEWSDOC/SHEF+StandardHydroeteorological+Exchange+Format">https://publicwiki.deltarein.nl/display/FEWSDOC/SHEF+StandardHydroeteorological+Exchange+Format</a> NWS																											
FEWS-17865	Plugin - Module - Data Import	Import for FEWS Bolivia	SENAMHI import	A new SENAMHI import module was added to FEWS.		<a href="https://publicwiki.deltarein.nl/display/FEWSDOC/SENAMHI+import">https://publicwiki.deltarein.nl/display/FEWSDOC/SENAMHI+import</a> SENAMHI																											
FEWS-14857	Plugin - Module - Data Import	Import json CoVadem data via http GET	New import (COVADEM) is available in FEWS.	The covadem webservice provides measurements of the river depth of ships. A new data import is available in FEWS to process this data. The Import is available with the tag <code>Covadem</code>.		NWS																											
FEWS-18212	Plugin - Module - Data Import	FEWS-17145 NetCDF irregular grid import - Automate geometry detection	NetCDF irregular grid import - Automate geometry detection for temporary time series	The existing NETCDF_GRID import was expanded. When the time series being imported has a timeSeriesType set to "temporary" or "temporary external forecast", the import no longer requires the grid to be configured in the grids.xml, but can automatically detect the grid geometry instead. The irregular grid geometry is stored along with the data, intended to be used later (within the same workflow). This is currently only available for grids that do not have z-values / z-layers.		<a href="https://publicwiki.deltarein.nl/display/FEWSDOC/NETCDF+CF_GRID">https://publicwiki.deltarein.nl/display/FEWSDOC/NETCDF+CF_GRID</a>																											

## XJIRA Delft-FEWS 2017.02 New Features

ID	Category	Description	Details	Screenshot	URL	Impact	
FWS-16899	Plugin - Module - Data Import	FEWS-16887 NWS: #23704 Import reservoir storage curves to allow display capabilities similar to rating curves	LookupTables	<p>Storage curves and any other curves can be stored in repository file (lookupTables.xml), according to the <code>&lt;table&gt;</code> element.</p> <p>Similar to the rating curves, the LookupTable curves can be displayed in TSD and can be used to create the right axis in the plots.</p> <p>Config example: <code>lookupTables.xml</code> contains very simple example configuration with imaginary data, to demonstrate the functionality (import scalar series first, see ImportBackupLocality).</p> <p>The lookup tables can be referenced using domain parameter Id, Parameter Id, optionally qualifier Id's and optionally location id.</p> <p>An example from DisplayGroups:</p> <pre>[code] &lt;output&gt;   &lt;lookupTables&gt;     &lt;inputColumnParameterId&gt;Stage&lt;/inputColumnParameterId&gt;     &lt;outputColumnParameterId&gt;Storage&lt;/outputColumnParameterId&gt;   &lt;/lookupTables&gt;   &lt;dimSeriesSet&gt;     ...   &lt;/dimSeriesSet&gt; &lt;/code&gt;</pre> <p>Picture: <code>lookupTablesAndRightAxis2</code> and <code>lookupTablesAndRightAxis2</code> shows the displays created with the example <code>LookupTables.xml</code> and <code>DisplayGroups.xml</code>.</p>			NWS
FWS-16916	Plugin - Module - Data Import	FEWS-16663 Import of bespoke Hydro Quebec prn files	Import type added: HydroQuebecPRN	Import for 3 Quebec locations, containing flow for 3 Quebec locations		<a href="https://publicwiki.deltas.nl/display/FWSDOC/HydroQuebecPRN">https://publicwiki.deltas.nl/display/FWSDOC/HydroQuebecPRN</a>	ModelCC
FWS-18525	Plugin - Module - Data Import	FEWS-16464 FOEN: Add separate year, month, day columns to generalcsv import	Add separate year, month, day, hour, minute and second columns to generalCsv import	The generalCSV import can now handle the date being specified through three separate columns (year, month and day), and the time being specified through one to three separate columns (hour, minute and second). If no second or minute column is given, they are assumed to be 0.		<a href="https://publicwiki.deltas.nl/display/FWSDOC/GeneralCSVImport#YearMonthDayHourMinuteSecondColumns(june2017.01)">https://publicwiki.deltas.nl/display/FWSDOC/GeneralCSVImport#YearMonthDayHourMinuteSecondColumns(june2017.01)</a>	FOEN
FWS-16131	Plugin - Module - General Adapter	FEWS-17266 importing multiple states in one GA run		<pre>[code] &lt;importStateActivity&gt;   &lt;importFileDir&gt;\${STATE_DIR}&lt;/importFileDir&gt;   &lt;stateFileDateFormatPattern&gt;\${state}yyyyMMddHHmm'.bin'&lt;/stateFileDateFormatPattern&gt;   &lt;relativeReportFile&gt;start.bin&lt;/relativeReportFile&gt;   &lt;importStateActivity&gt; &lt;/code&gt;</pre>		<a href="https://publicwiki.deltas.nl/display/FWSDOC/GeneralAdapter+Module">https://publicwiki.deltas.nl/display/FWSDOC/GeneralAdapter+Module</a>	TVA
FWS-18559	Plugin - Module - General Adapter	FEWS-14299 NFFS: Improve the exportCustomFormatRunFileActivity with format	added option to specify the width of output values in <code>exportCustomFormatRunFileActivity</code>	The <code>exportCustomFormatRunFileActivity</code> now takes two additional optional elements: <code>fixedWidth</code> and <code>numberOfDecimals</code> . The <code>fixedWidth</code> -element can be used to specify the length of the output each location attribute or property tag ("0" or "\$") is replaced with. The <code>numberOfDecimals</code> -element can be used to specify the number of decimals the number attribute values must be rounded to.	<pre>[code] &lt;generalAdapterRun online="http://www.widelft.nl/feewsmmln.xsd"&gt;   &lt;stateFileDir&gt;\${STATE_DIR}&lt;/stateFileDir&gt;   &lt;stateFileDateFormatPattern&gt;\${state}yyyyMMddHHmm'.bin'&lt;/stateFileDateFormatPattern&gt;   &lt;relativeReportFile&gt;start.bin&lt;/relativeReportFile&gt;   &lt;importStateActivity&gt; &lt;/code&gt;</pre> <pre>[code] &lt;general&gt;   &lt;startDateFormat&gt;yyyy MM dd HH mm&lt;/startDateFormat&gt;   &lt;endDateFormat&gt;yyyy MM dd HH mm&lt;/endDateFormat&gt;   &lt;general&gt;     &lt;activities&gt;       &lt;exportCustomFormatRunFileActivity&gt;         &lt;templateFile&gt;\${STATE_DIR}/templateFiles/event_tox2_template.imp&lt;/templateFile&gt;         &lt;exportFile&gt;event_tox2.imp&lt;/exportFile&gt;         &lt;fixedWidth&gt;10&lt;/fixedWidth&gt;         &lt;numberOfDecimals&gt;5&lt;/numberOfDecimals&gt;       &lt;/exportCustomFormatRunFileActivity&gt;     &lt;/activities&gt;   &lt;/general&gt; &lt;/generalAdapterRun&gt; &lt;/code&gt;</pre>	<a href="https://publicwiki.deltas.nl/display/FWSDOC/GeneralAdapter+Module#CustomFormatRunFileActivity">https://publicwiki.deltas.nl/display/FWSDOC/GeneralAdapter+Module#CustomFormatRunFileActivity</a>	EA

JIRA Delft-FEWS 2017.02 New Features

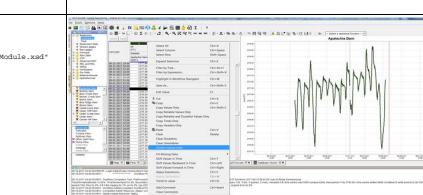

FEWS-16265	Plugin - Module - General Adapter	FEWS-17266 IVA: Add ImportShapefileActivity to GA module	Shape files can now be imported as time series via the importShapefileActivity in the generalAdapter	Shape files can now be imported as time series via the importShapefileActivity in the generalAdapter	<pre>&lt;code&gt;&lt;xml version="1.0" encoding="UTF-8"?&gt; &lt;?xml-stylesheet type="text/xsl" href="xsl/xslp_v2004.xsl"?&gt; &lt;xsd:1.1&gt; (W   Delft Hydraulics) --&gt; &lt;generalAdapterRun xmlns="http://www.widelft.nl/fews"   xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"   xsi:schemaLocation="http://www.widelft.nl/fews   http://www.widelft.nl/schemas/version1.0/generalAdapterRun.xsd"&gt;   &lt;!-- General information for General Adapter run --&gt;   &lt;general&gt;     &lt;rootDir&gt;\${REGION_HOME}&lt;/rootDir&gt;     &lt;workDir&gt;\${REGION_HOME}/workDir&lt;/workDir&gt;     &lt;importDir&gt;\${REGION_HOME}/importDir&lt;/importDir&gt;     &lt;importDir&gt;\${REGION_HOME}/polygons/importDir&lt;/importDir&gt;     &lt;dumpDir&gt;\${REGION_HOME}/polygons/dumpDir&lt;/dumpDir&gt;     &lt;dumpDir&gt;\${REGION_HOME}/polygons/dumpDir&lt;/dumpDir&gt;     &lt;diagnosticFile&gt;\${REGION_HOME}/diagnosticDir&lt;/diagnosticFile&gt;   &lt;/general&gt;   &lt;activities&gt;     &lt;importActivities&gt;       &lt;importShapefileActivity&gt;         &lt;importShapefileActivityId&gt;1&lt;/importShapefileActivityId&gt;         &lt;shapefileImportPattern&gt;ImportShapefileActivity..dat MM YYYY HH mm ss'.shp&lt;/shapefileImportPattern&gt;         &lt;fillDataTimePattern&gt;ImportShapefileActivity..dat MM YYYY HH mm ss'.shp&lt;/fillDataTimePattern&gt;         &lt;readWriteMode&gt;read&lt;/readWriteMode&gt;         &lt;timeSeriesType&gt;           &lt;timeSeriesType&gt;Netflow&lt;/timeSeriesType&gt;           &lt;timeSeriesType&gt;Waterlevel&lt;/timeSeriesType&gt;         &lt;/timeSeriesType&gt;       &lt;/importActivities&gt;       &lt;activities&gt;         &lt;readAllAdapterRun&gt;           &lt;code&gt; </pre> 	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/05_General+Adapter+Module#05GeneralAdapterModule_importShapefileActivity">https://publicwiki.deltas.nl/display/FEWSDOC/05_General+Adapter+Module#05GeneralAdapterModule_importShapefileActivity</a>	IVA
FEWS-17411	Plugin - Module - General Adapter	Import loop over directories while import ensemble results opeads using GA	Added unit tests and a clear description with config examples (also on WIKI) for an OpenDA ensemble member import	Added unit tests and a clear description with config examples (also on WIKI) for an OpenDA ensemble member import	<pre>&lt;code&gt;&lt;!-- in the workflow file specify the ensemble and index range to loop over --&gt; &lt;code&gt;&lt;!-- moduleConfigFile1.xml --&gt; &lt;?xml version="1.1" encoding="UTF-8"?&gt; &lt;generalAdapterRun xmlns="http://www.widelft.nl/fews"   xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"   xsi:schemaLocation="http://www.widelft.nl/fews   http://www.widelft.nl/schemas/version1.0/generalAdapterRun.xsd"&gt;   &lt;!-- activities --&gt;   &lt;moduleInstancesId&gt;ImportOpenDAEnsembles&lt;/moduleInstancesId&gt;   &lt;ensemble&gt;     &lt;ensembleId&gt;ImportDAEnsembleX&lt;/ensembleId&gt;     &lt;ensembleMemberIndexRange start="0" end="64"/&gt;     &lt;runInLoop&gt;false&lt;/runInLoop&gt;   &lt;/ensemble&gt;   &lt;activity&gt;     &lt;workflow&gt;       &lt;code&gt; <p>ModuleConfigFile1.xml should contain the &lt;ENSEMBLE_MEMBER_IDA tag in either the &lt;exportDir&gt; or &lt;importFile&gt; (in &lt;importNetcdfActivity&gt;). Do not specify the ensemble member. This only works for the importNetcdfActivity.</p> <p>Other activities that do not contain the &lt;ENSEMBLE_MEMBER_IDA tag will only be executed once.</p> <pre>&lt;code&gt;&lt;!-- moduleConfigFile2.xml --&gt; &lt;?xml version="1.0" encoding="UTF-8"?&gt; &lt;generalAdapterRun xmlns="http://www.widelft.nl/fews"   xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"   xsi:schemaLocation="http://www.widelft.nl/fews   http://www.widelft.nl/schemas/version1.0/generalAdapterRun.xsd"&gt;   &lt;!-- general --&gt;   &lt;description&gt;Test run for naauwboer&lt;/description&gt;   &lt;code&gt; </pre> </pre>	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/05_General+Adapter+Module#05GeneralAdapterModule_combinedwithWorkflowensembleloop">https://publicwiki.deltas.nl/display/FEWSDOC/05_General+Adapter+Module#05GeneralAdapterModule_combinedwithWorkflowensembleloop</a>	GLOFS
FEWS-17297	Plugin - Module - Modifiers (ModuleParameters)	create location specific drop-down enumeration in location attribute modifier using fixed boolean attributes	define location specific options in drop down list by using attributes	Attributes can be modified by using location attribute modifiers. By default the attributes can be changed by using a text box. It is also possible to use a drop down list. The content of this dropdownlist can be controlled by using a multi value attribute.	<pre>&lt;code&gt;&lt;!-- attributes id="NMD" --&gt; &lt;selection&gt;   &lt;option value="controllingLocationAttributeId=NMD_OPTIONS" /&gt; &lt;/selection&gt; &lt;!-- controllingLocationAttributeId="NMD_OPTIONS" --&gt; &lt;!-- comment--&gt;comment&gt;DefaultValue: \${NMD_DEFAULT}&lt;/comment&gt; &lt;/attribute&gt;&lt;/code&gt;</pre> 	<a href="https://publicwiki.deltas.nl/display/FEWSDOC/05_Modifiers#05Modifiers">https://publicwiki.deltas.nl/display/FEWSDOC/05_Modifiers#05Modifiers</a>	SAVA
FEWS-16912	Plugin - Module - Modifiers (ModuleParameters)	FEWS-16887 NWS - #25022 incorrect BASEFLOW and UNITHG model interaction	Combine multiple module parameter modifiers	The unitHG modifiers and baseflow modifier are both module parameter modifiers which both apply changes to the same module parameter file. It is now possible to apply multiple module parameter modifiers to the same module parameter file. This means that it is now possible to apply a unitHG and baseflow mod to the same module parameter file at the same time.			NWS

JIRA Delft-FEWS 2017.02 New Features							
FEWS	Module	Description	Details	Screenshot	Impact	Owner	
FEWS-17561	Plugin - Module - Modifiers (ModuleParameters)	FEWS-16887 NWIS: #34172 (a) CHPS Calibration: add attributeModifier capability for snow17, sacsma, lagk parameter calibrations	Calibration modifiers can now be used in combination with csv files	It is possible to use attributes in the general adapter parameter export. It was not possible yet to combine this feature with the calibration modifiers (multiple model modifiers). This is now possible.		NWS	
FEWS-14900	Plugin - Module - Modifiers (TimeSeries)	FEWS-16887 NWIS: #24038 Add shift arrows for UNITHG mod	UNITHG modifier - shift arrows to shift the unit hydrograph ordinate values	The unit hydrograph ordinate values can be shift forward or backward using the forward or backward arrows. Times in fields "Start time", "End time" and "Valid time" are shifted accordingly. To shift the values, also a context menu "Shift Values forward in Time (Ctrl Right)" and "Shift Values backward in Time (Ctrl Left)" can be used.  An example is shown in the picture UNITHG_shiftButtons.png		NWS	
FEWS-10848	Plugin - Module - Performance Indicators	FEWS-10851 Performance Indicators: Store all individual indicator values in separate time series	leadTimeAccuracyIndicator - new options to store intermediate indicator values and forecast and observed values, that have been used for the analysis, in the output time series arrays	To create the new output time series, use the following options: - intermediateValueSerialized to create time series with intermediate indicator values - analysedCalculatedValueSerialized to create time series with exact those forecast values, that have been used for the analysis - analysedObservedValueSerialized to create time series with exact those observed values, that have been used for the analysis  Config example is available in PerformanceIndicator.xml  The new time series are created for each input forecast. For example, if 2 input forecasts are used, then also 3 time series with intermediate values are created. To be able to create multiple simulated forecasts using the same TimeSeriesSet, the ensembles are used. Values associated with a particular forecast are stored using an ensemble member Id and this member Id equals to the forecast time of that forecast.  An example: Picture LeadTimePerformanceIndicatorResults.png shows the results of the computation that has been done using the config example PerformanceIndicator.xml This example uses observed series (O.m) and 3 input forecasts (Q.s.m). For each input forecast the following series are created: Intermediate values (O.mss.interm), forecast values used in the analysis (O.s.m.analysed) and observed values (O.mss.analysed).		RWS	
FEWS-10847	Plugin - Module - Performance Indicators	FEWS-10851 Performance Indicator: Set the <forecastsSelectionPeriod> manually in the FEWS Client	Performance Indicators: manually setting of the forecastSelectionPeriod and changing of the relativeViewPeriod	"Manually setting of the forecastSelectionPeriod" When the user selects the cold state, it is not known how much of the forecasts or hindcast should be analyzed. The configured forecastSelectionPeriod can be changed manually in the ManualForecastDialog or in the RunOptions of the IFD Forecasts, by selecting a certain cold state or warm state. The forecastSelectionPeriod should have the attributes startOverruleable and/or endOverruleable, to specify that the changing of the forecastSelectionPeriod is allowed.  The user selects Cold state if only the start of the forecastSelectionPeriod should be amended. Then the cold state start time is used as start of the forecastSelectionPeriod. ForecastSelectionPeriod should have an overruled start. (code:xml) <forecastSelectionPeriod unit="day" start="-10" end="0" startOverruleable="true"/> (code) The user selects Warm state if the start and also the end of the forecastSelectionPeriod should be amended. The warm state start time and end of the forecastSelectionPeriod, the warm state start time is used as the end of the forecastSelectionPeriod. ForecastSelectionPeriod should have an overruled start and end. (code:xml) <forecastSelectionPeriod unit="day" start="-3" end="0" startOverruleable="true" endOverruleable="true"/> (code) *Manually setting of the relativeViewPeriod of the			RWS

JIRA Delft-FFWS 2017-02 New Features

F1WS1084	Plugin - Module - Performance Indicators	F1WS10851 Performance Indicator: store number of analyzed samples in separate TimeSeries	Performance Indicator module : leadTimeAccuracyIndicator optionally stores number of analyzed samples in separate time series	<p>The number of samples is stored in single time series, referenced with sampleOutput</p> <pre> &lt;sampleOutput variableId="sampleOutput"&gt;   &lt;code&gt;[...]&lt;/code&gt; &lt;/sampleOutput&gt; &lt;leadTimeAccuracyIndicator indicatorType="manuaguarerror"&gt;   &lt;calculatedVariableId="calculated" observedVariableId="observed" outputVariableId="output" sampleOutputVariableId="sampleOutput"&gt;     &lt;code&gt;[...]&lt;/code&gt; &lt;/leadTimeAccuracyIndicator&gt; &lt;code&gt;[...] &lt;/code&gt; </pre> <p>The number of samples is also stored in time series per lead time period:</p> <pre> &lt;code&gt;[...] &lt;leadTimePeriod start="0" end="1" outputVariableId="output1"&gt;   &lt;sampleOutputVariableId="sample1" observedVariableId="observed" outputVariableId="output" sampleOutputVariableId="sampleOutput"&gt;     &lt;code&gt;[...]&lt;/code&gt; &lt;/leadTimePeriod&gt; &lt;leadTimePeriod start="0" end="4" outputVariableId="output4"&gt;   &lt;sampleOutputVariableId="sample4" observedVariableId="observed" outputVariableId="output" sampleOutputVariableId="sampleOutput"&gt;     &lt;code&gt;[...]&lt;/code&gt; &lt;/leadTimePeriod&gt; &lt;leadTimePeriod start="0" end="6" outputVariableId="output6"&gt;   &lt;sampleOutputVariableId="sample6" observedVariableId="observed" outputVariableId="output" sampleOutputVariableId="sampleOutput"&gt;     &lt;code&gt;[...]&lt;/code&gt; &lt;/leadTimePeriod&gt; &lt;leadTimeAccuracyIndicator&gt; &lt;code&gt;[...] &lt;/code&gt; </pre>	RWS
F1WS1754	Plugin - Module - Reports	use scadaPanel defined in scadaDisplay for reports and other scadaDisplays	SchematicStatus display : scadaPanels , configured in one SchematicStatus display, can be included in other SchematicStatus displays or in reports	<p>Use option scadaPanelId to include scadaPanels , configured in other SchematicStatus displays, in a particular SchematicStatus display or in a particular report.</p> <p>In SchematicStatus display both scadaPanel and scadaPanelId can be mixed.</p> <p>When we use scadaPanelId, then also the numberFormat(), dateFormat() and variables that are configured in the referred SchematicStatus display are used.</p> <p>The formats and variables from the referred SchematicStatus display can be overruled by configuring the same Id's but with a different content in the display with scadaPanelId.</p> <p>When using scadaPanelId, then all scadaPanels should have an unique Id. If there are any duplicates, then the first scadaPanel found is used.</p> <pre> &lt;scadaDisplay.xml&gt; &lt;code&gt;[...] &lt;scadaDisplay xmlns="http://www.wldelft.nl/fews"   xmlns:sai="http://www.w3.org/2001/XMLSchema-instance"   xmlns:admin="http://www.wldelft.nl/fews"   xmlns="http://www.wldelft.nl/fews"   http://www.wldelft.nl/fews?wsdl?xsd=0@scadaDisplay.xsd"&gt;   &lt;displayName&gt;SSD composed&lt;/displayName&gt;   &lt;valueWidget&gt;     &lt;absoluteViewPeriod unit="day" start="-1" end="0"/&gt;     &lt;timeNavigatorTimeStep unit="hour"/&gt;     &lt;/absoluteViewPeriod&gt;     &lt;showImeNavigatorToolbar&gt;       &lt;background color="gray" background-color="gray" background-color="backgroundColor"&gt;         &lt;scadaPanelId&gt;panelA&lt;/scadaPanelId&gt;         &lt;scadaPanelId&gt;panelB&lt;/scadaPanelId&gt;       &lt;/code&gt; &lt;/scadaDisplay&gt; </pre>	IWP
F1WS17207	Plugin - Module - Reports	F1WS17202 extend functionality overlocationInTable	Reports/Scada template function improvements	<p>*VALUECOUNT(Type, variableId)</p> <p>This function counts the number of values in the time series. The argument "type" specifies the value type that should be counted.</p> <p>Supported types are ALL, MISSINGS, COMPLETED, COMPLETED_RELIABLES, UNRELIABLES, DOUBTFUL</p> <p>Usage in Reports:</p> <pre> &lt;VALUECOUNT(COMPLETE_MEASURED)&gt;   Usage in Sada : &lt;VALUECOUNT(COMPLETE)&gt; </pre> <p>*"THIS SHOULD CROSSINGCOUNT"(&lt;level threshold id&gt;, &lt;variableId&gt;)</p> <p>This function counts the number of time steps in which the level thresholds have been crossed. If a specific level threshold id is configured, then only the crossings for this threshold are counted.</p> <p>Usage in Reports:</p> <pre> &lt;THRESHOLDROSSINGCOUNT&gt; &lt;THRESHOLDROSSINGCOUNT&gt;(Level A, hMeasured) &lt;THRESHOLDROSSINGCOUNT&gt;(Level A, hMeasured)   Usage in Sada : &lt;THRESHOLDROSSINGCOUNT&gt;(), &lt;THRESHOLDROSSINGCOUNT&gt;(hMeasured) </pre> <p>Option *'ignoreMissing' in STATISTICS function</p> <p>Use ignoreMissing if the missing values should be ignored while evaluating of the statistics function. By default the statistics are not computed if the time series has one or more missing values.</p> <p>Usage in Reports:</p> <pre> &lt;STATISTICMEAN&gt;(ignoreMissing: H.m, numberFormat1)   Usage in Sada : &lt;STATISTICMEAN&gt;(ignoreMissing: numberFormat1) </pre>	APP

 JIRA Delft-FEWS 2017.02 New Features

JIRA Delft-FEWS 2017.02 New Features							
FEWS17853	Plugin - Module - Transformation	FEWS-17145 Transformation Module - Merge simple optimization	new merge transformation MergeInterpolation	<p>The transformation can be used to merge multiple input grids to a single output grid. More detailed information can be found at:  <a href="https://publicwiki.deltares.nl/display/FEWSDOC/Merge+Interpolation">https://publicwiki.deltares.nl/display/FEWSDOC/Merge+Interpolation</a></p> <pre>[code]&lt;transformation id="merge_interpolation_example"&gt; &lt;merge&gt; &lt;interpolation&gt; &lt;inputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/inputVariables&gt; &lt;interpolationType&gt;closestDistance&lt;/interpolationType&gt; &lt;outputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/outputVariables&gt; &lt;/interpolation&gt; &lt;/merge&gt; &lt;/transformation&gt;[code]</pre>			
FEWS17470	Plugin - Module - Transformation	Configure keywords for transformation elements	added possibility to provide a property (\$) to several transformation config elements	<p>Added necessity to provide a property (\$) to the following elements:</p> <ul style="list-style-type: none"> <li>* InterpolateActivity -&gt; maximumSnapDistance &amp; maximumVerticalSnapDistance</li> <li>* TimeSeriesImportGeneral -&gt; maximumSnapDistance &amp; maximumVerticalSnapDistance</li> <li>* InterpolateSpatialClosestDistance -&gt; searchRadius &amp; distanceGeoColumn</li> <li>* InterpolationSpatialVerticalProfileClosestDistance -&gt; searchRadius &amp; distanceGeoColumn</li> <li>* InterpolationSpatialHessenPolygon -&gt; distanceGeoColumn</li> <li>* InterpolateSpatialInverseDistance -&gt; searchRadius &amp; distanceGeoColumn</li> <li>* InterpolationSpatialSnapTrackLocations -&gt; maximumSnapDistance</li> <li>* TimeShiftConstant -&gt; numberOffTimeSteps</li> </ul>		Deltares	
FEWS18053	Plugin - Module - Transformation	FEWS-14299 FFFS: Allow use of multiple coordinates for locations	added possibility to overrule location coordinates via attributes to closestDistance transformation	<p>The spatial interpolation transformation &lt;closestDistance&gt; now has two additional optional elements -&lt;overrulingAttribute&gt; and &lt;overrulingValue&gt;. If both are configured, the attribute value is used instead of the location coordinate if present, i.e. if the location has this attribute and has a value for the attribute. Otherwise, the regular coordinate is used. This is done for both input and output variables.</p> <pre>[code]&lt;transformation id="closestDistanceWithOverrulingCoordinates"&gt; &lt;interpolationSpatial&gt; &lt;closestDistance&gt; &lt;inputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/inputVariables&gt; &lt;overrulingAttribute&gt;xAlt_X&lt;/overrulingAttribute&gt; &lt;overrulingAttribute&gt;xAlt_Y&lt;/overrulingAttribute&gt; &lt;overrulingAttribute&gt;yAlt_Z&lt;/overrulingAttribute&gt; &lt;outputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/outputVariables&gt; &lt;/closestDistance&gt; &lt;/interpolationSpatial&gt; &lt;/transformation&gt;[code]</pre>		<a href="https://publicwiki.deltares.nl/display/FEWSDOC/InterpolationSpatial#closestDistance">https://publicwiki.deltares.nl/display/FEWSDOC/InterpolationSpatial#closestDistance</a>	EA
FEWS18052	Plugin - Module - Transformation	FEWS-14299 FFFS: New Raingauge weighting function	added option to use multi-value attributes to decide inputs for weighted average transformation	<p>The existing interpolationSpatial - weighted transformation now supports the use of multiple input locations and their weights through two multi-value attributes of the output location. This means the module config file no longer needs to contain a transformation for each combination of inputs and output, but a single transformation using locationSets can be configured.</p> <pre>[code]&lt;transformation id="interpolation_spatial_weighted"&gt; &lt;interpolationSpatial&gt; &lt;weighted&gt; &lt;weightAttribute&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/weightAttribute&gt; &lt;inputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/inputVariables&gt; &lt;attributeName&gt;locationSet&lt;/attributeName&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/attributeName&gt; &lt;outputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/outputVariables&gt; &lt;weightAttribute&gt;WEIGHTS&lt;/weightAttribute&gt; &lt;weightAttribute&gt;WEIGHTS&lt;/weightAttribute&gt; &lt;attributeOutputVariables&gt; &lt;variableId&gt;&lt;/variableId&gt; &lt;/attributeOutputVariables&gt; &lt;/weighted&gt; &lt;/interpolationSpatial&gt; &lt;/transformation&gt;[code]</pre>		<a href="https://publicwiki.deltares.nl/display/FEWSDOC/InterpolationSpatialWeighted">https://publicwiki.deltares.nl/display/FEWSDOC/InterpolationSpatialWeighted</a>	EA
FEWS17732	Plugin - Module - Transformation	FEWS-17264 TWA: Edited data not overwritten in transformations, temporary flag	Preserve manual edits in transformation and clear manual edits from dataviewer	<p>A new configuration has been added to the transformationModule to allow preserving manual edits. By default manual edits were overwritten. It's now also possible to clear manual edits from the TimeSeriesDialog dataviewer.</p>	<pre>[code]&lt;transformationModule xmlns="http://www.wldelft.nl/fews" prefixUri="http://www.w3.org/2001/XMLSchema-instance" prefixNs="http://www.wldelft.nl/fews" version="1.0"&gt; &lt;preserveManualEdits&gt;false&lt;/preserveManualEdits&gt; &lt;/transformationModule&gt;[code]</pre> 	<a href="https://publicwiki.deltares.nl/display/FEWSDOC/2017TransformationModule-Improved-schema-ManualEdits">https://publicwiki.deltares.nl/display/FEWSDOC/2017TransformationModule-Improved-schema-ManualEdits</a>	TWA
FEWS16869	Plugin - Module - Transformation	New transformation: copy a (2D) data from an arbitrary time level in the past to a time series over a relative view period	New sample transformation SampleSingleTimeStep	<p>A new sample transformation is available for copying the values of a time series with a single time step to all of the time steps in the view period of another time series. The transformation can be used for scalar and grids.</p>	<pre>A config example is available in the documentation: <a href="https://publicwiki.deltares.nl/display/FEWSDOC/sampleSingleTimeStep">https://publicwiki.deltares.nl/display/FEWSDOC/sampleSingleTimeStep</a></pre>	<a href="https://publicwiki.deltares.nl/display/FEWSDOC/sampleSingleTimeStep">https://publicwiki.deltares.nl/display/FEWSDOC/sampleSingleTimeStep</a>	RWS (NL)

JIRA Delft-FEWS 2017.02 New Features

<a href="#">FEWS-16034</a>	Plugin - Module - Transformation	FEWS-17266 TWA: ability to use PI tables (1D scalar resp series) as lookup tables in transformations.	It is now possible to use LookUpTables.xml from RegionConfig in the simple and twoDimensional lookup transformations by referencing with locationId, inputParameterId and outputParameterId.	It is now possible to use LookUpTables.xml from RegionConfig in the simple and twoDimensional lookup transformations by referencing with locationId, inputParameterId and outputParameterId.	<pre>&lt;example&gt; lookup based on 1 input value&lt;/example&gt; &lt;http://publicwiki.deltares.nl/display/FEWSDOC/Simple+1D+lookupsingLookUpTables.xmlfromRegionConfigFile&lt;/code&gt; &lt;xsd&gt; version="1.0" encoding="UTF-8"&gt; &lt;transformationModule version="1.0"   xmlns:xsd="http://www.w3.org/2001/XMLSchema-instance"   xmlns="http://www.w3.org/2001/XMLSchema-instance"   xsi:schemaLocation="http://www.w3.org/2001/XMLSchema-instance   http://www.w3.org/2001/XMLSchema-instance   http://fews.widelft.nl/schema/version1.0/transformationModule.xsd"&gt;   &lt;variables&gt;     &lt;variable id="variable1"&gt;       &lt;timeSeriesSet&gt;         &lt;moduleInstancId&gt;SimpleLookupFromPITableTest&lt;/moduleInstancId&gt;         &lt;valutype&gt;scalar&lt;/valutype&gt;         &lt;parameterId&gt;n&lt;/parameterId&gt;         &lt;locationId&gt;1&lt;/locationId&gt;         &lt;timeSeriesType&gt;external historical&lt;/timeSeriesType&gt;         &lt;timeStep unit="nonequidistant"/&gt;         &lt;readWriteMode&gt;add&lt;/readWriteMode&gt;         &lt;start&gt;1970-01-01T00:00:00&lt;/start&gt;         &lt;end&gt;1970-01-01T00:00:00&lt;/end&gt;         &lt;readWriteMode&gt;add originals&lt;/readWriteMode&gt;       &lt;/timeSeriesSet&gt;     &lt;/variable&gt;     &lt;variable id="variable2"&gt;       &lt;timeSeriesSet&gt;         &lt;moduleInstancId&gt;SimpleLookupFromPITableTest&lt;/moduleInstancId&gt;         &lt;valutype&gt;scalar&lt;/valutype&gt;         &lt;parameterId&gt;obs&lt;/parameterId&gt;         &lt;locationId&gt;1&lt;/locationId&gt;         &lt;timeSeriesType&gt;external historical&lt;/timeSeriesType&gt;         &lt;timeStep unit="nonequidistant"/&gt;         &lt;readWriteMode&gt;add&lt;/readWriteMode&gt;         &lt;start&gt;1970-01-01T00:00:00&lt;/start&gt;         &lt;end&gt;1970-01-01T00:00:00&lt;/end&gt;         &lt;readWriteMode&gt;add originals&lt;/readWriteMode&gt;       &lt;/timeSeriesSet&gt;     &lt;/variable&gt;   &lt;/variables&gt;   &lt;information id="simpleLookupFromPITable"&gt;</pre>	<a href="https://publicwiki.deltares.nl/display/FEWSDOC/twoDimensional+lookupsingLookUpTables.xmlfromRegionConfigFile">https://publicwiki.deltares.nl/display/FEWSDOC/twoDimensional+lookupsingLookUpTables.xmlfromRegionConfigFile</a>	TWA	
<a href="#">FEWS-18102</a>	Plugin - Module - transformation	Covadem: spatial interpolation of p-dic percentiel bodenligging tracklayers in view period naar output polygons	A new interpolation transformation "trackToGrid" was added.	The new transformation produces a grid time series from track. The time series of the track is converted into a grid cell track values. The time series is then linked to the closest time for this grid cell. To obtain the output values, either the minimum of the maximum of all track values corresponding to a grid cell and output time combination is used. Optionally, a minimum number of track values and a percentile range can be provided.			<a href="https://publicwiki.deltares.nl/display/FEWSDOC/transformation+-+InterpolationSerial-TrackToGrid">https://publicwiki.deltares.nl/display/FEWSDOC/transformation+-+InterpolationSerial-TrackToGrid</a>	Covadem
<a href="#">FEWS-18101</a>	Plugin - Module - Transformation	Covadem: interpolatie tijd en plaats van grid of profile lijfbereik na bestaand track layer tijdsseries	A new interpolation transformation "LongitudinalProfileToTrack" was added.	The new transformation produces values for a track using closest distance interpolation. It takes three time series as input: the longitudinal profile, track latitude and track longitude and produces a single scalar time series as output, which can be used as track values. See the wiki for more information.			<a href="https://publicwiki.deltares.nl/display/FEWSDOC/transformation+-+InterpolationSerial-LongitudinalProfileToTrack">https://publicwiki.deltares.nl/display/FEWSDOC/transformation+-+InterpolationSerial-LongitudinalProfileToTrack</a>	Covadem
<a href="#">FEWS-17153</a>	System	FEWS-16767 Replace JMS messages between MC and MC Proxy with entry in ForecastingBells table						Deltares - Roadmaps
<a href="#">FEWS-17152</a>	System	FEWS-16767 Create overview of all places where and which JMS messages are sent						Deltares - Roadmaps
<a href="#">FEWS-17756</a>	Database - System	FEWS-16767 Create Dftf_SQL.jar						Deltars - Roadmaps
<a href="#">FEWS-17756</a>	System	FEWS-16132 add some scripte scripts to delete local databases from all clients inc. SR						EPA
<a href="#">FEWS-17744</a>	System	Improve fews.sh script on LINUX to interpret memory settings from .ini	fews.sh script improved	On Linux fews.sh script now by default has 1024Mbyte on max heap size.			<a href="https://publicwiki.deltares.nl/display/FEWSDOC/02+Linux+FEWS">https://publicwiki.deltares.nl/display/FEWSDOC/02+Linux+FEWS</a>	Deltares
<a href="#">FEWS-18149</a>	System	Merge configured truststore with JDK default truststore	client truststore will be merged with default JDK truststore	On a client a custom truststore is configured, only the public certificates in that store were trusted. If no keystore is configured, all public certificates in the JDK are used to keep track of trusted servers. This resulted for example in failure of https requests that used to work when no truststore was configured in the request. Now it is possible to configure for which the root certificate was in the trusted JDK store. With this change the root certificates of the JDK will be merged with the ones configured in the custom truststore.				Deltares
<a href="#">FEWS-16618</a>	System - PI Service	FEWS-15083 Simplify installation and system administration		Simplification and alignment of FEWS Webserivces has been completed: <ul style="list-style-type: none"><li>• Integrated all the different implementations of the pi-webserivce into a single war-file.</li><li>• Integrate the DAC jar into this war-file.</li><li>• Remove requirement to change Tomcat configurations.</li><li>• Removed requirement to add libraries to Tomcat lib dir.</li><li>• Made it possible to start and debug a pi-webservice from Intelij (FEWS development environment)</li></ul>			<a href="https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+Web+Services">https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+Web+Services</a>	Deltares
<a href="#">FEWS-18371</a>	System - PI Service	FEWS-15983 PI locations xsd should support location attributes added to PI service	location attributes added to PI service	Location attributes are now available in the PI service: <a href="https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+PI-REST+Web+Service">https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+PI-REST+Web+Service</a> Passing the showAttributes=true parameter to the locations resource, will generate the locations attributes. (code) curl "http://localhost:8080/FEWSWebServices/rest/fewspie/locations?showWithAttributes=true&documentVersion=1.2"				
<a href="#">FEWS-16975</a>	System - PI Service	Add status page to PI webservice	The pi webservice (REST) has now a small status page to facilitate debugging	The pi webservice (REST) has a small status page (status.jsp) which can be used to get some basic information about the webservice. The page provides info about the memory usages and several basic configuration options.				Deltares - Roadmaps
<a href="#">FEWS-16619</a>	System - PI Service	FEWS-15083 Improve testability	Testability of Fews Web Services improved.	FEWS test pages have been improved and made available for both PI-SOAP and PI-REST services. The testability of the FEWS Web Services has been improved. On the public Wiki examples are given on how to test the REST service using the curl command line.			<a href="https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+PI-XM+REST+service">https://publicwiki.deltares.nl/display/FEWSDOC/FEWS+PI-XM+REST+service</a>	Deltares - Roadmaps

## XJIRA Delft-FEWS 2017.02 New Features

<a href="#">FEWS-17639</a>	System - PI Service	FEWS-15083 Align functionality of PI Webservice SOAP with PI Webservice REST	PI Webservice REST service has been aligned with SOAP service	All functionality available in the PI Webservice SOAP is now also available in the PI Webservice REST API. One exception is the support of POSTING binary timeseries to the REST service.			<a href="https://publicwiki.deltas.nl/display/FEWSDOC/FEWS-PI+XML+REST+service">https://publicwiki.deltas.nl/display/FEWSDOC/FEWS-PI+XML+REST+service</a>	Defates - Roadmaps
<a href="#">FEWS-17093</a>	System - PI Service	FEWS-16132 Update the PI Service so that it will Import Modifiers	Import modifiers added to the pi-webservice	The pi-webservice is extended with a service which can be used to upload modifiers.			<a href="https://publicwiki.deltas.nl/display/FEWSDOC/FEWS-PI+XML+REST+service">https://publicwiki.deltas.nl/display/FEWSDOC/FEWS-PI+XML+REST+service</a>	BPA
<a href="#">FEWS-16901</a>	System - PI Service	FEWS-16887 NWS: #24580 Supply PI-service port numbers to FEWS plug-ins	Additional consumer interface added to the Open API	<p>It is now possible for custom plugins to obtain the port number at which the pi-webservice was started by implementing an interface.</p> <p>If a plugin implements the following interface:</p> <pre>public interface IMetadataServerPortConsumer {     void setPortNumber(int portNumber); }</pre> <p>The port number will be provided to the plugin by invoking the implementation of the method setPortNumber.</p>				NWS
<a href="#">FEWS-17020</a>	System - PI Service	Retrieve manual edits from PIService	Added argument to getTimeSeries that allows client to retrieve only manual edits	For the method getTimeSeries it is now possible to pass the argument 'onlyManualEdits'. When used in combination with the arguments startCreationTime and endCreationTime it is possible to return all manual edited values from FEWS.				Java
<a href="#">FEWS-17801</a>	System - Session	FEWS-16767 Remove usage of Session classes from OC	Obsolete session classes removed. Session has been simplified to 1 row in the database with a unique id.	Obsolete session classes removed. Session has been simplified to 1 row in the database with a unique id.				Defates - Roadmaps
<a href="#">FEWS-16446</a>	System - Synchronisation	FEWS-16767 Data clientConfig.xml jms configuration JMServerInstallComplexType has no option to specify timeout		Not relevant anymore since JMS has been removed	Not relevant anymore since JMS has been removed			Defates - Roadmaps
