

Sediment

In this section (Generic data – Sediment) you can define the characteristics of sediment which can be used in all tools.

The following sediment characteristics can be defined:

	Default Value	Unit	Min.	Max.	Brief Description
D ₅₀	200	m	0.01	2000	Median grain size.
D ₉₀	300	m	0.01	2000	90 th percentile sediment size.
Porosity	0.4	-	0.01	0.99	Fraction of voids.
Density	2650	kg/m ³	1000	5000	Bulk sediment density.
