Admin Interface User Guide

Admin Interface User Guide - 2017.02 and before

This section contains a detailed description of the **Delft-FEWS Admin Interface** from version **2018.02** and later. All menu items and corresponding options are described on separate pages.

## DELFT-FEWS: Admin Interface User Guide

This User Guide provides guidance in the use of the Delft-FEWS Admin Interface (AI). The Admin Interface provides a tool to a System Manager to monitor and maintain the Delft-FEWS components on the central servers and - to a limited extent - the forecasting shell servers.

The screenshot shows the 'roadmapmc00 postgres - Dashboard' interface. It features a sidebar menu with categories like System Status, Forecast Tasks, Workflow and FSSs, Files, User Administration, System Control, Configuration Management, Database Analysis, and Documentation. The main content area displays several status cards: 'MC Details' for roadmapmc00, roadmapmc01, and roadmapmc02; 'Running Tasks Details' showing 0 running and 0 pending tasks; and 'Active Users Details' showing 0 active users. Below these is a 'roadmapmc00 Components Status' section with 'Task Run Manager Status', 'MC Rolling Barrel Status', and 'System Alerter Status' all marked as 'OK'. The 'FSS Status' section contains a table with the following data:

MC ID	FSS Group ID	FSS ID	Status	Running Workflow ID	Last Workflow Status	Last Run Workflow ID	Last Task Run Dispatch Time	Last Heartbeat
roadmapmc00	linux_postgres	4100	Restarting To Use Patched Base Build		Complete		21/02/2019 09:13:02	21/02/2019 09:13
roadmapmc00	windows_fs008_postgres	3980	Ready		Complete	21/02/2019 09:15:00	21/02/2019 09:15:45	21/02/2019 09:15
