

OpenEarth DataLab cooperation agreement Deltares - 3TU. Datacentrum

3TU.Datacentrum and Deltares signed a cooperation agreement to confirm their collaborative effort on further development and promotion of the OpenEarth DataLab.

The OpenEarth DataLab, presently successfully in use for the Sand motor data (zandmotordata.nl), is implemented and hosted by 3TU.Datacentrum and based on the OpenEarth stack as designed by Deltares.

The signature of both parties on the agreement initiates the process of bringing the OpenEarth DataLab code open source.

For more information, contact the [3TU.Datacentrum](#) team or the OpenEarth team of [Deltares](#).
