

Scheduled Tasks - Upload - 2018.02 - 2021.01

Upload Tasks

This screen allows the scheduling of a set of new tasks, defined in an XML-file which must be uploaded through this interface.

Upload tasks XML file

File

Replace

☐ Check to replace current tasks with the tasks in the uploaded file. Existing tasks will be marked as finished

Upload

After selecting a file containing the set of task definitions in the file selection dialogue that is opened when pressing the "Browse..." button, press "Upload" to upload the file. The file should conform to the [taskList.xsd](#) schema. An XML file in this format can be obtained from [Download All Scheduled Tasks](#), or from Download Task from the [Task Details Screen](#).

Uploading tasks will only add tasks, not replace them. Uploading lists of tasks multiple times will bring duplicate tasks into the system. Please check the "replace current tasks" checkbox to mark all current scheduled tasks as finished if you want to replace all tasks.
