

Operator Client audit trail event log messages

The following table explains which audit trail event code is generated by the Operator Client by which trigger. The columns are as follows:

- OC Display: The name of the Operator Client Display where the functionality is available
- Functionality: A description of the functionality that triggers the event code.
- Event Code: The actual value of the event code that will be triggered.

OC Display	Functionality	Event Code
Data Editor	Save Manually Edited Data Values or Flags	SYSLOG.OC.SaveTimeSeriesValues
	Save Time Series Modifier	SYSLOG.OC.SaveTimeSeriesModifier
Modifiers	Apply Modifier	SYSLOG.OC.SaveLocalModifier
	(De)activate Modifier	SYSLOG.OC.ActivateLocalModifier
	Delete Modifier	SYSLOG.OC.DeleteLocalModifier
	Copy Modifier	SYSLOG.OC.CopyLocalModifier
Forecast Manager	Set Forecast Current	SYSLOG.OC.SetForecastCurrent.[WORKFLOWID]
	Change Forecast Expiry Time	SYSLOG.OC.SetForecastExpiryTime. [WORKFLOWID]
	Rerun Forecast	SYSLOG.OC.ReRunForecast.[WORKFLOWID]
	Delete Forecast	SYSLOG.OC.DeleteForecast.[WORKFLOWID]
System Monitor	Acknowledge Error/Fatal Log Message	SYSLOG.OC.AcknowledgeLog
	Edit a Scheduled Task	SYSLOG.OC.EditScheduledTask.[WORKFLOWID]
	Suspend a Scheduled Task	SYSLOG.OC.SuspendScheduledTask. [WORKFLOWID]
	Resume a Scheduled Task	SYSLOG.OC.ResumeScheduledTask. [WORKFLOWID]
	Cancel a Scheduled Task	SYSLOG.OC.CancelScheduledTask.[WORKFLOWID]
	Kill a running task	SYSLOG.OC.KillRunningTask.[WORKFLOWID]
Manual Forecast	Send Task to Master Controller (one off)	SYSLOG.OC.AddScheduledTask.[WORKFLOWID]
	Create a new Task Schedule (Task interval for certain period)	SYSLOG.OC.AddScheduledTask.[WORKFLOWID]
Scenario Editor	Send Task to Master Controller (one off)	SYSLOG.OC.AddScheduledTask.[WORKFLOWID]
Taskrun Dialog	Send Task to Master Controller (one off)	SYSLOG.OC.AddScheduledTask.[WORKFLOWID]
Manual Forecast / Forecast Tree	Schedule a Task	SYSLOG.OC.AddScheduledTask.[WORKFLOWID]
