

Connecting the ecosystem to Delft-FEWS

Introduction

This page contains an overview of all applications, tools and 'brands' which can be connected to Delft-FEWS by means of (one of) the Delft-FEWS Webservices.

The thematic table below gives a first overview (and is work in progress). If available, a sub-page can be opened for more details, like configuration examples and installation aspects.

Overview of existing connections

Theme	Application (or brand)	Available since	More info
Dashboarding	Microsoft PowerBI		https://powerbi.microsoft.com
	Tableau		
	Lizard		https://helen-schuurmans.nl/
Messaging	Telegram	2017.02 (backport) 2019,02 and up	Report Export Module
	Imtech Alarm Module	2011.02 and up	Imtech Alarm Module
