Introduction

Welcome to the *Water Management in New Orleans* public wiki! This website is intended to provide information about (ground)water management for New Orleans project to 'Reshape the Urban Delta'. This project, made possible by funds from National Disaster Resilience Competition (NDRC), aims to deliver groundwater and subsurface insights and data to help the planning of initiatives that increase flood resilience.

This public wiki serves does not contain much in-depth information, but rather functions as a guide to publicly available documents and applications. It is structured in accordance with the sub-projects displayed below.
