

3 - (Video)Tutorials

Tutorial

The tutorial and data for HABITAT 3.0 can be downloaded [here](#).

To download the most recent version of HABITAT please visit the [OSS Deltares site](#), register and download HABITAT free of charge.

Video tutorials

 These video tutorials are from an older version of HABITAT.

In order to have a quick start with HABITAT, view the following movies with an example of the use of the instrument. The videos show an example of the analysis of the habitat suitability for macrophytes (*Chara* spp.) in the Lake Marken in the Netherlands. It involves the following videos:

- Add a scenario and model. [Download Video1](#)
- Add more models (table reclassification and formula base model), including linking of model results. [Download Video2](#)
- Calculation and short analysis of results. [Download Video3](#)
