About OATC

Tasks

The OpenMI Association Technical Committee (AOTC) is a sub-committee under the OpenMI Association Executive Committee (OAEC). The main tasks for the OATC are:

- To provide support for OpenMI developers and users through the OpenMI help forum
- To maintain released software packages (e.g. react on bug reports)
- To develop the OpenMI software development kit (SDK) and the OpenMI configuration editor based on according to submitted feature requests.
- To make recommendations to the OAEC with respect to new versions of the OpenMI Standard.

News

- 15/07/2010: OpenMI Standard 2.0 Beta available.
  The OATC finalized and made available the beta version of the 2.0 Standard.
