

Tests moved to different location

As of this friday (march 25) tests that were located in the trunk of the [OpenEarthTools repository](https://repos.deltares.nl/repos/OpenEarthTools) have been moved to a new test location (<https://repos.deltares.nl/repos/OpenEarthTools/test/>).

Developers are requested to store all tests and test data in the sub folders at this (test)location, to avoid contaminating our source code (trunk). The test dir can be checked out in the same way as the trunk, or even as one repos (when checking out the complete <https://repos.deltares.nl/repos/OpenEarthTools/>).
