

Database with measurements

General

This page shows an overview of available measurements. These measurements fulfill the requirements described in the Guideline Rapid Load testing, which will be published by CUR Committee H410 end of 2010, see for more information [CUR bouw en infra \(external site\)](#).

This page contains for each measurement a short description of the situation and a contact address of the owner. Please contact the owner for more information and usage of the measurements.

Available measurements

Waddinxveen 2008

Two instrumented prefabricated concrete piles were tested both statically and rapidly.
