

Speeding up Matlab and Handling Large Datasets

This is the **MathWorks** presentation of the course held in **Zoetermeer**, the **26th of April**.

Several techniques are explained to make Matlab running faster and handle large datasets. Unfortunately, for many of the applications described, [Parallel Computing ToolBox](#) is required.

If you have troubles with loading the file, visualize it [here](#).

Visit <http://www.mathworks.nl/> or contact giorgio.santinelli@deltares.nl for any further information.
